Title of Workshop: Multidimensional cybersecurity measures- Current opportunities and challenges in using indices to understand cybersecurity

Organiser: ITU-D Cybersecurity

WSIS FORUM 2021
Starting from January
Final Week 17-21 May 2021

Emerging Trends

- Cybersecurity is becoming increasingly complex, and continuing to evolve
- Indices can be useful to simplify some aspects
- International coordination remains a challenge

Concrete Actionable Items Identified

- Incidies need to constructed with stakeholder consultation, which will be part of Global Cybersecurity Index
- More work needs to be done to clearly communicate index outputs

Challenges

- Many different stakeholders need to be involved
- Communicating nuance and local context
- Reliable and comparable data collection, especially in developing countries
