- [ANNEX 4: Contributions received during the first and second virtual Meetings of the Open Consultation Process](#) 500

Executive Summary of the Outcomes

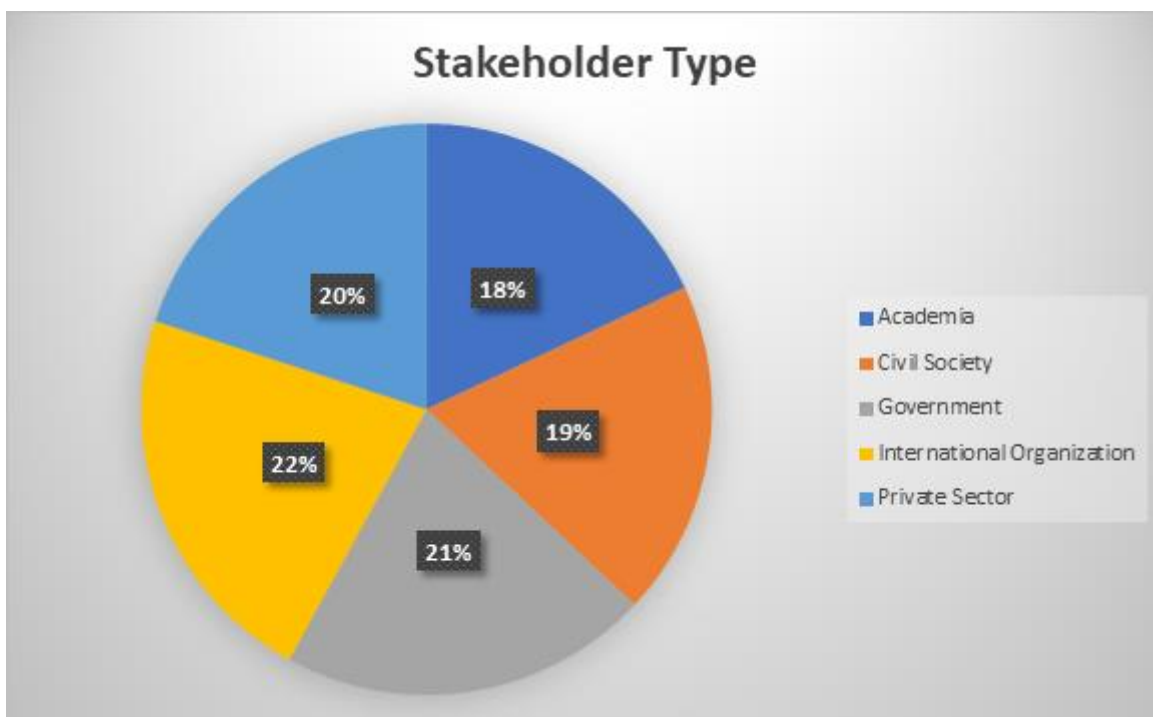

I. Open Consultation Process (OCP): A bottom up approach to building the agenda of the WSIS Forum

The agenda and program of the WSIS Forum 2021 are designed in collaboration with the multistakeholder community based on official submissions received during the Open Consultation Process on the thematic aspects and innovations of the format of the WSIS Forum 2021. Engaging all WSIS stakeholders (governments, civil society, private sector entities, academia and technical community, and international organizations), this process aims to ensure an active participation across sectors in forming the agenda and the programme of the WSIS Forum, highlighting linkages between the WSIS Action Lines and the Sustainable Development Goals (SDGs). The OCP for the WSIS Forum 2021 began in September 2020 and was structured in five phases. All related information can be found at: <https://www.itu.int/net4/wsis/forum/2021/Home/Consultations>

II. Official Submissions received

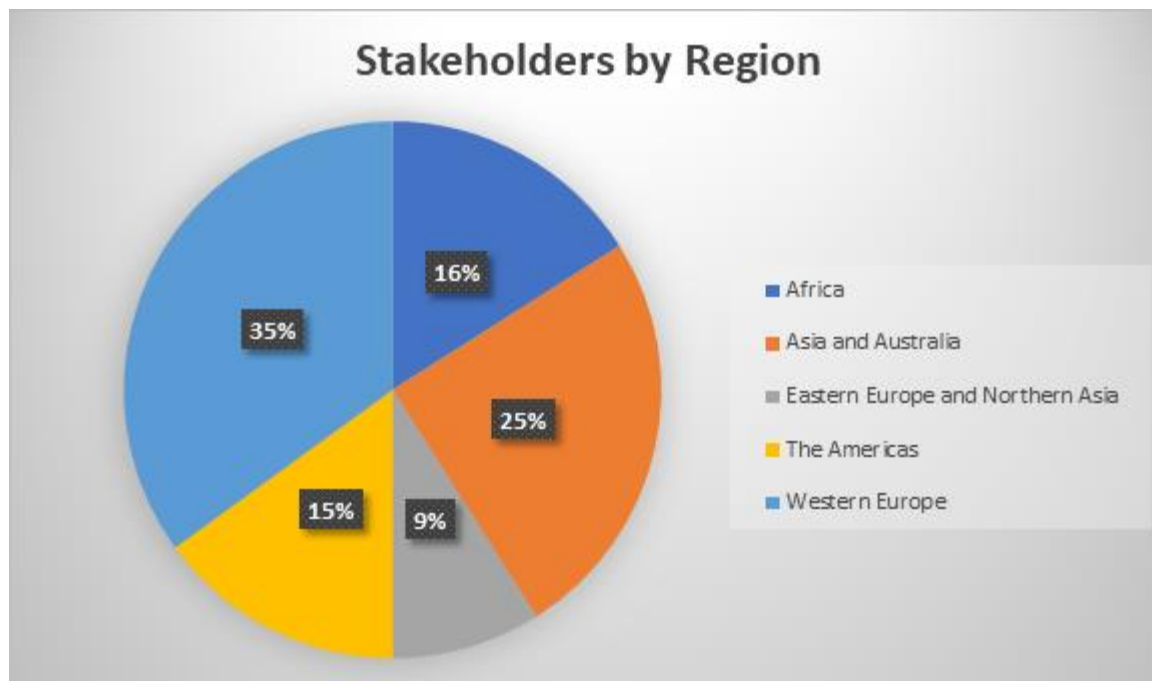

The WSIS Secretariat received more than 500 submissions containing proposals on the thematic aspects and innovations on the format of the WSIS Forum 2021, including requests for partnerships, workshops, exhibition spaces, etc.

III. Submissions by Stakeholder Type (received through the OCP form):

Please note that the agenda and workshops of the WSIS forum includes the engagement of more than 32 United Nations (UN) Agencies, including UN Regional Commissions. The statistics above represent the submissions and suggestions received through the Open Consultation Process form of the WSIS Forum 2021.

IV. Submissions by Region Type (received through the OCP form):

It is important to note that about half of submissions from Western Europe came from the headquarters of organizations with an international presence.

V. Summary of Outcomes:

The WSIS Forum 2021 Open Consultation Process further highlighted the necessity and demand for inclusive and development-oriented information societies. The Forum is regarded as an opportunity for stakeholders to exchange information on ICTs, share success stories and best practices, identify emerging trends, and foster global partnerships with different stakeholders – from governments, private sectors, civil societies, academia to youth – in leveraging such Information and Knowledge Societies. WSIS continues to further encourage best practices from local, national and regional levels to further promote the advancements of SDGs worldwide.

WSIS Forum 2021 was organized and carried out entirely in a virtual format. Stakeholders this year, emphasized the global impact of the COVID-19 crisis around the world. The capability of ICTs and the need for strengthened collaboration and coordination was a recurring theme touched upon by nearly all stakeholders from the private, public and international sectors. There is a lot of confidence in leveraging ICTs in recovering from the impact of the pandemic as well to progress towards building back better in relation to the 2030 Agenda for Sustainable Development. The theme of this year's WSIS Forum is ***ICT is for Inclusive Resilient and Sustainable Societies and Economies with WSIS Action Lines for Achieving the Sustainable Development Goals***. Special

tracks this year include, ICTs and Youth, ICTs and Gender Mainstreaming, and ICTs and Accessibility for Persons with Disabilities and Special Needs. ICTs for Older Persons, Cybersecurity and Emerging Technologies for Sustainable Development are relatively new tracks with a greater demand for workshops in 2021. This year, WSIS also explored new ways of making the networking experience more enriching by having a virtual exhibition space for stakeholders to present their work and facilitate discussions. Most notable topics put forward for WSIS 2021 were emerging trends such as Artificial Intelligence, Blockchain, Internet of Things, 5G, the accelerated pace of digitization, bridging digital divides and cybersecurity. Discussions ranged from technical and ethical implications of these frontline technologies. Demand for workshops regarding gender mainstreaming, women empowerment through digital technology and challenges of minority women from around the world were also greater than previous years.

The WSIS Forum derives its strength and success through the participation of a wider range of multistakeholders who continue to leverage ICTs for realising the SDGs. In conclusion, international bodies from around the world are pooling their strengths, to contribute in achieving the SDGs and implementing the WSIS Action Lines towards the 2030 Sustainable Development Agenda.

VI. Topics for discussion for specific WSIS Action Lines:

Stakeholders were asked to recommend topics they wanted to see discussed in relation to the WSIS Action Lines. Many of the recommendations covered several Action Lines but have been organized according to their primary focus. This list provides a general overview of the submissions and is not exhaustive. Considering the role of the WSIS Action Lines in encourage global partnerships between stakeholders, and promoting the sharing of expertise and technology, the following topics were recommended:

Role of governments and all stakeholders (ALC1):

- Public/Private partnerships (PPPs) and their uses in ICT development
- Methods of collaboration
- Government and stakeholder policies for unlocking human productivity and potential
- Alignment of investment strategies across governments

ICT Infrastructure (ALC2):

- Expanding rural broadband access in developing countries and the use of internet exchange points
- ISP competition for infrastructure contracts
- Network and connection reliability
- Transport networks and ICTs

Access to information and knowledge (ALC3):

- Access to telecommunications for indigenous territories and vulnerable populations
- ICTs and aging well

- Including young persons in internet governance policy and decision making
- Pandemic driven inequality
- Student connectivity and equal access to educational resources
- Virtual learning for visually impaired students

Capacity building (ALC4):

- ICT resilience and crisis response functions
- ICT Global Youth Summit as an annual event to promote long-term youth engagement
- Expanding digital infrastructure
- Renewable energy infrastructure
- 5G
- Smart and sustainable cities

Building confidence and security in the use of ICTs (ALC5):

- E-inclusion training for older persons
- Digital literacy and education
- E-resilience in crises
- Legal cyber education
- Online transaction security
- Intergovernmental cybersecurity drills and exercises

Enabling environment (ALC6):

- Enabling technologies to empower women through education, equal opportunities, and healthcare access
- Gender-inclusive technologies

ICT applications (ALC7):

- Healthcare technologies and scaling for the future
- Food security technologies in global agriculture
- Green ICTs and application to climate emergency
- Integration of local communities with ICTs for land management and wildlife preservation
- Immersive platforms
- Epidemiology tools
- Augmented Reality (AR) for racial equity training
- Science and technology for artists and musicians

Cultural diversity and identity (ALC8):

- Local digital content specialised for local languages, communities and cultural practices

Media (ALC9):

- How can university stakeholders of ITU promote and contribute to the WSIS process and public engagement
- AI and deep machine learning techniques for media and event access

Ethical dimensions of the Information Society (ALC10):

- Ethical ‘infonomics’ and data exchange
- Regulatory and ethical frameworks for Artificial Intelligence (AI) and encryption
- Promoting digital economies while building a digital taxation framework
- Competition in ICT industries
- Using mobile device data responsibly

International and regional cooperation (ALC11):

- Role of WSIS in a globalised post-pandemic era
- Cybersecurity coordination and threat sharing internationally and regionally
- Coordinated digital taxation and regulatory frameworks at the regional level
- Global principles of AI regulation and desired development goals
- Scalable alliances for bespoke ICT projects
- Tertiary education research collaborations
- Regional e-platforms

Many of these suggestions were made with a broader consideration for sustainable development and how the Action Lines could be achieved across different sectors. Stakeholders were also keen to emphasize the importance of collaboration with multistakeholders : governments, private sector, academia and civil society. Topic suggestions largely engaged with international, regional and local applications indicating that a multilateral approach is necessary to achieve the WSIS Action Lines.

VII. Suggested ideas in the alignment of WSIS Action Lines efforts to advance the achievement of SDGs:

Stakeholders were asked to suggest ideas for how the WSIS Forum could better ensure its alignment with the UN 2030 Agenda Sustainable Development Goals. Many of the suggestions were directly applicable to the format of the WSIS Forum, while some considered how the WSIS process could promote ICTs in the advancement of the SDGs. The overwhelming response was that the SDGs required the involvement of international and regional stakeholders and local grassroots organisations in order to find workable solutions and meet their objectives. Stakeholders also highlighted the challenges of measuring SDG attainment in the real world and backed assisting the private sector in implementing SDGs as part of their growth strategies. The following list provides an overview of the suggested ideas and is divided into two sections: (i) Forum formatting ideas, (ii) Strategies to implement SDGs.

Forum formatting ideas:

- Workshops on COVID-19 mitigation measures and their application to SDGs
- Display videos or tutorials showing implementation of WSIS Action Lines and how they align with SDGs
- Virtual meeting rooms to conduct focus groups with stakeholders on how to balance their services and needs to achieve SDGs
- Promote the UNGA WSIS Review through business and academia by organizing regional and local events to showcase Forum achievements
- Consult with more on the ground organisations who work directly with end-users to guide ICT development for SDGs
- Educate stakeholders on how to monitor and measure their performance in relation to SDGs
- Link governmental ministries on a common platform to share best practices and encourage greater funding
- Map stakeholder contributions to SDGs to reward implementation
- Facilitate accurate and centralised data collection and distribution to guide innovators
- Invite more local leaders, including mayors, to ensure SDGs have regional take-up
- Ensure equal global representation from the continents
- Frame project development and scalability through the lens of SDGs
Yearly SDG evaluation and feedback for all stakeholders to spot improvement and possible areas for collaboration

Strategies to implement SDGs:

- Consider intersectionality of SDGs in relation to digital connectivity and WSIS Action Lines
- Use AI technologies to tackle development problems while coordinating regulatory and ethical development
- Assess the impact of projects in accordance with performance indicators and quality assurance measures centred on SDGs
- District Ambassador programmes to highlight grassroots and local ICT solutions in non-English speaking communities
- Remote internship programmes for women and minorities to promote gender equality
- Reinforce commercial incentives for growing businesses sustainably
- Ethical data sharing between private and public institutions
- Help match ICT providers with pilot programmes and entrepreneurial ideas designed for SDGs
- Prioritise internet safety training and tools for women
- Coordinate assistive technologies for persons with disabilities
- Foster low-energy use ICTs
- Consider role of low-cost smart devices in developing communities
- Intellectual property strategies for start-ups to protect innovation

VIII. Regional Input from regional meetings to the WSIS Forum 2021:

Stakeholders were asked to express their viewpoints on how local, national and regional activities could be more visible within the WSIS Forum process. The most common theme among the suggestions was the importance of enabling grassroots inclusion, support, and partnerships within the ICT ecosystem. Repeated calls were made to promote more local projects that are less publicised than their national counterparts. To achieve this, it was suggested that WSIS focus on establishing connections with local and regional institutions and bolster participation through local portals, community pages, and social media groups. Several stakeholders requested a dynamic ICT projects database to share local and regional ICT solutions and provide a platform for partnerships and scalability. The database was envisioned as a constantly updated portal to allow ideas conceived at the WSIS forum to be followed up and nurtured. One stakeholder suggested district ambassador programmes to coordinate regional projects, alongside a contribution mechanism to allow local stakeholders to get involved in or replicate successful projects. Multiple stakeholders further emphasised the need for information exchange between the different layers of ICT, from the international to the local.

IX. Themes and Topics suggested by WSIS Stakeholders:

1. SDGs and their relation to indigenous people
2. ICTs and Women Empowerment
3. Artificial Intelligence as a Tool for Development
4. Emerging Technologies i.e. Blockchain, Big Data, Internet of Things Towards Sustainable Development
5. Telehealth
6. Cyberlaw, Cyber Crime and Cybersecurity
7. E-Government, Commerce, Trade
8. Smart Sustainable Cities
9. ICTs in Disaster Risk Reduction
10. ICTs and Older Persons, Seniors and Aging
11. E – Education
12. E- Employment
13. Communication and Humanitarian Aid in the Digital Age
14. Innovation and Collaboration Conducted Virtually
15. E-learning for Refugees
16. ICTs and Emerging Trends in Agriculture
17. ICTs in the Age of a Global Pandemic
18. ICTs to Support Vulnerable and Underserved Populations
19. Multilingualism
20. ICTs and Accessibility
21. Digital Transformation and Development
22. Global Implications of the Global Pandemic
23. Digital Literacy

24. ICTs to Empower Children with Disabilities
25. ICTs Disaster Risk Reduction
26. Capacity Building
27. Bridging Digital Divides
28. Accessible Media

X. Suggested innovations in the Structure and format:

Participation:

WSIS Stakeholders acknowledged the values and principles of the multistakeholder cooperation model and engagement that have characterised the WSIS process since its inception. Submissions to the OCP for WSIS 2021 noted the following with regard to the effective participation at the Forum:

The Forum’s effectiveness could be strengthened by:

- A balanced mix of stakeholders considering gender, regional, and stakeholder type representation
- A youth association within the WSIS Forum which would provide an opportunity to attract more young professionals to the area of ICTs for sustainable development
- A hackathon that is specific to Africa's unique landscape eg use of Simple feature phones, adjusting to the many languages of Africa, use of voice to overcome literacy barriers etc.
- Expanding out to organizations outside of the UN network
- More speakers from the private sector
- Greater involvement of technological experts in the fields of infotech, biotech and application, law makers and politicians
- strengthened communication platforms that allow networking between participants and exchanging best practices
- Setting up parallel meetings during the event, connecting random participants in short groups (up to 4 participants), would improve networking efforts and allow for participants to connect with each other and share interests and common objectives for further collaboration enhancing the visibility of WSIS Forum
- Attracting more people from emerging markets, who are actually facing the problems in their daily lives (no access to education/mobility/inclusion) or who are actually working with these groups of people on a daily basis
- Exploring avenues to link to other global ICT related events. Bring together global ideas across all the sector to ensure alignment of vision and reduce fragmentation and duplication, both of which are common issues within the ICT development sector

Suggestions Related to Accessibility and Inclusion:

- Digital tools such as podcasting to promote and conduct interviews
- A more compact programme in order to create a momentum, with one or two flagship sessions able to attract a global tech audience. Enabling the networking between participants

- The ability to contribute by text, possibly linked to low bandwidth audio versions of the events. This will allow data poor communities to contribute
- A blended approach (physical and virtual) is relevant as it addresses the need to network and also closes the distance gaps for those that cannot travel
- Retain the multi-stakeholder format. Mix high-level panel with different profiles but ensure that key international, regional, national and local decision makers are involved
- A collaborative online tool to share bodies of work and further engage

Link with the SDG Process:

- The utilization of AI-driven technologies that should ensure a significant contribution to the attaining of an SDG
- Using videos that show the implementation of the actions proposed with the goals and aspirations of the 2030 Agenda for Sustainable Development
- The WSIS forum could organize and highlight key thematic workshops and high-level discussion on the various interventions that have successfully supported COVID-19 mitigation and response aligned with the SDGs
- Discussions should take place and strategic recommendations developed on how to mainstream ICT for SDGs at the national digital policies in the country. This could include development of a toolkit on ICT for SDGs
- The WSIS Forum can consider in its efforts to better ensure alignment of efforts with SDG implementation increased inclusion of innovative industry actors, such as entrepreneurs and startups, that are visioning, designing and implementing approaches and solutions that assist with achieving the 2030 agenda
- Objectives of the SDGs and WSIS Action Lines are noteworthy and relevant but many are hard to monitor and measure. Some individual SDGs and Action Lines are overlapping There is a need for better coordination
- Dedicate specific expert sessions to each of the 17 SDGs in relation to ICT evolution and impact
- WSIS could facilitate in providing accurate statistics, that would help innovators and solution providers in designing their offerings accordingly
- A series of workshops focusing on the examples and good practices in applying ICT in the realisation of the SDG goals and targets
- All content presented at WSIS should clearly demonstrates which SDGs it supports or contributes toward achieving
- Partnerships between public sector, private sector and civil society is extremely important in the promotion of ICTs for development, as stated in the WSIS outcomes. Partnerships working together and contributing to ICTs for sustainable development could therefore be featured and presented in a separate section in the WSIS Forum 2021

Regional Focus

- Organizing regional and local events would help a lot to inform all the interested audience about main achievements and issues in the field of Sustainable Development
- As the regions of the world gain momentum in organizing for digital cooperation, the structure and program of the WSIS Forum could facilitate discussion of the issues from a regional standpoint. Representatives of regional efforts could come together to compare/contrast their approaches. With the aim of creating new understandings and meaningful ideas for actions to take following the discussions, it could be beneficial to discourage pre-written remarks, and instead encourage extemporaneous discussion
- Retain the multi-stakeholder format. Mix high-level panel with different profiles but ensure that key international, regional, national and local decision makers are involved

Interactive Sessions

- It could be interesting to group activities by categories (advocacy, capacity building, cash-based project, coordination, evaluation, funding...) and then organise round tables which could occur during lunch times and be presented as small webinars. At the end of the session participants could access a database where they could find all the details toward the activities presented, where they are developed, and links to websites and associated presentation material
- Make smaller sessions with max 35/40 people and make them hybrid, with panels answering questions from participants live after a brief introduction of themes to be discussed. Video tape quality to be posted on YouTube. Make YouTube, Zoom, Teams, and Facebook lives to encourage audience participation
- In order to make the High Level Segments more dynamic and interactive, we suggest that the sessions maximize the dialogue among panelists, to strengthen ties of collaboration and to create new support networks. Also, it is necessary to allow more interaction with participants, leaving enough time for questions and answers from the public
- Interactive session between policy makers and open access advocates
- Detailed topics of the sessions; - detailed matching of session participants to its topic; - specific time and scope of questions for the audience in order to avoid drifting away from the main problem; - active audience participation
- We would propose to introduce a few quiz questions that would make the session interactive for participants. Not only they will be more engaged, but it will bring the gaming aspect to the session. This can be linked to social networks and a tailored webinar could be offered as a gift to promote the winner's organization or administration
- Beneficial to have a quarterly 2-day event in which to combine different sessions. This could help to publicise the activities and maximise participation
- We suggest to publish, before the event, a short abstract of each High-Level Segment contribution in order to let the audience better interact on the occasion of the event. This may even enable the creation of clusters of participants interested

in debating on the specific topic after each set of High-level Segment short presentations. We suggest to collect some questions from the floor concerning each high level segment and after the delivery of the speeches open the floor to Q&A

Other

- Strengthen the links with other global events and bring together some of the key insights from WSIS as an input to these events and a dedicated session during the annual event
- In the WSIS Forum 2021, the programme agenda could be organized and searchable by theme areas/action lines
- ICTs to engage youth and accelerate the achievement of SDGs, developing digital skills and innovation . Data and statistics • Technology • North-South, South-South, international and regional partnerships • Finance • Policy coherence
- Given the impact of technologies on society, I would add more focus on ethical issues
- Increasing the participation of private entities interested in digital transformation as well as in opportunities and challenges associated with it

XI. Recommended themes and format for the High-Level Segment:

A. Topics and Themes for High-Level Segment

WSIS stakeholders, through the 2021 Open Consultation Process, proposed a wide range of potential topic areas for the High Level Segment of the 2021 WSIS Forum. The following section provides an overview of this comprehensive consultation data and identifies the major challenges and areas of interest identified by stakeholders. The recommended proposals were largely focused around three topics: (i) Covid-19 pandemic, (ii) digital inclusion, (iii) technological change and innovation.

A number of stakeholders identified the numerous challenges posed by the ongoing Covid-19 pandemic and its implications for global health and development. Many desired the development of ICTs to enable cooperation between international institutions and governments, including crisis response tools and data sharing to promote collaborative research and development in epidemic control. Several stakeholders emphasised the increased importance of connectivity in accessing telemedicine, communication, education, and the digital economy, and it was suggested that connectivity be assessed on a progressive rather than binary scale to better reflect differing levels of ICT access.

Drawing on the 2030 Agenda, our stakeholders asked to address the significant challenges of digital inclusion and the widening digital divide catalysed by the pandemic. Suggestions included training older persons in the use of vital ICTs and the development of tools, digital literacy, and infrastructure to enable indigenous communities, persons with disabilities, and those with different socioeconomic backgrounds to access digital resources. It was also suggested that data collection be segmented by demographic when assessing digital accessibility. Particular concern was given to gender inequality with calls for a gender bias review of social media platforms and algorithms,

alongside a wider consideration of the use of ICTs to empower women in employment and leadership positions.

Many stakeholders also called for the creation of regulatory and legal frameworks for several emerging technologies including artificial intelligence, blockchain systems, and the Internet of Things. Several suggestions emphasised the importance of cybersecurity in a digitised economy and called for greater threat protection and public education on digital vulnerabilities. Finally, stakeholders emphasised the rapid innovation required to pursue decarbonisation and produce renewable technologies in order to meet the UN's Sustainable Development Goals.

Further suggested topics included:

- Universal design
- ICTs in community development
- Supporting survivors of gender-based violence using ICTs
- Role of e-commerce
- Health ecosystems for WHO declared health challenges (HIV, TB, Malaria, NCDs)
- ICTs in humanitarian aid and human rights
- Food security, agriculture, and smart logistics using ICTs
- AI tools for dementia
- Online educational access for remote communities and quarantined learners
- Broadband infrastructure and reliability
- Disinformation management and 'information pollution'

B. Suggestions for interactive format of the High-Level Segment

The Open Consultation Process produced a number of suggestions to make the High Level Segment more engaging and interactive. Audience participation was a recurring theme throughout the suggestions with stakeholders recommending a greater use of breakout rooms, messaging features, and interactive dashboards to allow audiences to directly engage with the contributors. This included lengthening the time available for audience questions and reducing the panellists' reliance on pre-prepared remarks to foster genuine discussion. There was also an interest in leveraging social media platforms for a similar purpose through tools such as live sessions, audience polling, hashtags, and social media collaborations. Several stakeholders were keen to see more spontaneity in discussions and encouraged potential debate-style formats by limiting

response times and ensuring panellists could exchange ideas without referring to scripted remarks. The range of contributors was also recognised with stakeholders suggesting greater multi-generational participation by inviting younger contributors to engage with world leaders.

XII. Open Consultation Process Phases:

The Open Consultation Process of the WSIS Forum aims at ensuring the participatory and inclusive spirit of the gathering. It actively engages governments, civil society, the private sector, academia and international organizations in the preparatory process ensuring multistakeholder participation and constant evolution of the Forum.

ITU, UNESCO, UNCTAD and UNDP invited all WSIS stakeholders to contribute to the Open Consultation Process on the Thematic Aspects and Innovations on the Format of the WSIS Forum 2021.

The Annual WSIS Forum Open Consultation Process was appreciated by the stakeholders as a platform that provides an equal opportunity to participate in building the Agenda and Programme of the Forum. Some suggested that the Secretariat explore ways of collecting information from the regional and national levels through effective remote participation including the use of social media and SMS.

The Open Consultation Process for the WSIS Forum 2021 is structured in five phases as follows:

- **Phase I: 9 September 2020:** Launch of the Open Consultations – The launch was held virtually to all stakeholders during the final week of the WSIS Forum 2020. The recording is available at the following link: <https://bit.ly/37NfbFx>
- **Phase II: 6 November 2020:** 1st Virtual Meeting – The first virtual meeting of the Open Consultation Process took place during the Internet Governance Forum (IGF) 2020. The recording is available at the following link: <https://www.youtube.com/watch?v=A8d0fK7etVI>

- **Phase III: 1 February 2021, 14:00-15:00 CET:** 2nd Virtual Meeting
- **Phase IV: 8 March 2021:** Deadline for Submissions of Official Contributions and Binding Requests for Workshops
- **Phase V: 19 April 2021:** Final Brief on the WSIS Forum 2021

WSIS Forum 2021: Open Consultation Process
ANNEX: Submissions received pertaining to the themes and structure of the WSIS Forum 2021

WSIS Forum 2021 Submissions

OPEN CONSULTATIONS ON THEMATIC ASPECTS AND INNOVATIONS ON THE FORMAT

The three following annexes are a compilation of official submissions received from WSIS stakeholders during the Open Consultation Process from 4 December 2020 to 8 March 2021. The document displays overall suggestions for topics to be included during WSIS Forum 2021 and binding requests for workshops. Please note that the agenda of the WSIS Forum each year builds upon the submissions received during the Open Consultation Process.

ANNEX 1: Submissions received through the online open consultation process pertaining to the themes and structure of the WSIS Forum 2021

Number	Organization Name	Stakeholder Type	Country	Innovation and Structure	Alignment WSIS-SDG	Thematic Workshop	Ideas for visibility of local, national, and regional projects	Equal participation in the parallel workshops at the WSIS Forum

27	Baotree	Private Sector	Kenya (Republic of)	<p>Software - technology that can transform our planet, people and allow for a symbiotic relationship when done well. The world of conservation needs to become a for-profit sector and not rely on the NGO models - given in the last 50 years, we've lost 68% of all living species! Things need to change and fast, which is where technology comes in.</p>	<p>The UN SDGs need to become more dynamic and agile, to move with our fast paced world - an element of a holistic solution that factors in conservation, community, culture and commerce. This is where true scalable, transparent and measurable social, economic and environmental outcomes can stem from.</p>	<p>The role technology has to play with merging people and planet into a holistic ecosphere of sustainable mutual growth</p>

34	Oxfam International	International Organization	Kenya (Republic of)	<p>Since the early 2000s, digital technologies have had continuously and rapidly changing implications for the way the world works. These technologies have transformed how people interact socially, engage in public debates and political discourse, or organise and mobilise for working and living. There is much enthusiasm around such platforms and tools (as demonstrated already in WSIS)</p>	<p>ICTs as a tool and the spaces it provided are useful. However, there are cases that ICT and digital spaces are misused. For example, The Gulf Centre for Human Rights, issued a statement in October 2019 expressing concern over women human rights defenders being targeted through ‘deepfake’ technology to manipulate their photos, videos, voices or text, exposing them to significant</p>	<p>WSIS and its partners will need to reach out to collect good practices at the grass-roots level. WSIS’s sharing of good practices could be inspiring and provide opportunities for their visibility. Oxfam could be helpful for connections. Oxfam has projects with local partner organisations. The Community Innovation Centre project is an example, see https://cambodia.oxfam.org/bridging-digital-divide-cambodia</p>	<p>It depends on the meaning of ‘equal participation’. If it means the composition of panellists, the organiser should pay attention to gender balance and geographical representation.</p>

51	Geneva Centre of Humanitarian Studies	Academia	Switzerland and (Confederation of)	<p>The WSIS forum 2021 will last from January to May 21st 2021; this event takes place over a long period of time and the main challenge in such circumstances is to keep the momentum and also track records. The most innovative suggestions could be : - to organise a hackathon (I think it will be one of the options this year based on your agenda) but also contribute to it as the event organiser. This is for instance what the Open</p>	please see previous question	Perspectives on key humanitarian concepts, how can ICT foster the debate?	<p>It could be interesting to group these activities by categories (advocacy, capacity building, cash-based project, coordination, evaluation, funding...) and then organise round tables which could occur during lunch times and be presented as small webinars. At the end of the session participants could access a database where they could find all the details toward the activities presented, where they are developed, and links to websites and associated presentation material.</p>	<p>To gain proper audiences, it is key to keep the workshops on a 1 to 1:30 hour format. It should be dispatched at strategic moments of the day, when people are not busy with their own activities, which is during lunch time and / or end of the day. People also need to gain knowledge out of the forums. They usually like to contribute their thoughts and ideas, but gain specific knowledge, and learn in return. Workshops contributions can be enhanced by providing short pre-works to be done (through survey, or game style), and follow up work after the session (that should also be quick and practical).</p>

58	IFT	Government	Mexico	<p>At the last Sustainable Development Goals (SDG) Summit held on September 2019, a call was made to mobilize all sectors of society to guarantee and promote compliance of the SDG. Additionally, the need to conduct actions at the global, local and personal level was highlighted. Therefore, we consider that this Forum provides a space that allows the implementation and coordination of</p>	<p>We consider that the WSIS Forum has properly aligned its Action Lines (AL) with the SDG. Nevertheless, to improve the implementation and achievement of the SDG, it is necessary to promote greater participation of actors from other sectors, such as education, health, agriculture, etc. In this way, collaboration networks between sectors could be built,</p>	<p>We consider that the virtual modality of the forum allows greater involvement of actors at the local and regional level, so it is necessary to strengthen this format. This way, it will also be possible to guarantee that the Forum implements activities that are more related and focused on the needs of each region or locality. Additionally, greater linguistic diversity in the activities organized by the forum will further promote the participation of national and local actors.</p>	<p>To achieve it, all workshop organizers should be invited to seek equitable participation, and to try avoid hosting workshops that do not abide by this principle.</p>

34	Oxfam International	International Organization	Kenya (Republic of)	<p>Exchange of good practices – not theories – that ICT can support social inclusion and development would be useful. The inclusion of disadvantaged populations and sharing case studies of their participation in the information and knowledge society to make change happen will be inspiring.</p>	<p>For instance, the WSIS Action Line 6 ‘Enabling Environment’ and its creation is still to be achieved. Despite providing an alternative space, the digital space is not a totally safe environment. It remains, in many countries, yet another public space which mirrors the patriarchal social norms of the offline world, and sometimes brings additional dangers due to the anonymity it gives to perpetrators of violence. For instance, women’s use of digital platforms and their transgression of social norms often leads to multiple forms of violence and harassment, both online and offline.</p>	<p>WSIS will need to connect with grassroots organisations promoting women’s right, social justice and equality. It would be also useful to work with network organisations in these areas. If WSIS can support them to hold or participate in panel discussions and exhibitions, for them to share experiences, it would be inspiring.</p>

52	Oslo Metropolitan University	Academia	Norway	<p>I have two suggestions for topics for discussion. First, universal design in sustainable development, which relates to WSIS Action Line 2, 3, and 8. Second, gender-inclusive innovation ecosystems, which relates to WSIS Action Line 2, 4, 8 and 9.</p>	<p>The first main challenge facing the implementation of the WSIS Action Lines is an awareness of the legal requirements, economic incentives, and social benefits of universal design, which relate to WSIS Action Lines 2, 3, and 8. The second main challenge facing the implementation of the WSIS Action Lines is grassroots capacity building that uses a life-course perspective to enable women and girls to participate in innovation clusters and contribute to the development of innovation ecosystems.</p>	<p>Key partnerships that may strengthen the implementation of WSIS till 2025 and beyond include outreach to grassroots communities of practice including programmers, software engineers, and technology developers and include a focus on entrepreneurs, startups, technology transfer offices, innovation hubs, startup labs, and co-working spaces. The addition of end-user groups such as disabled peoples' organizations; racial, ethnic, religious, and sexual minority groups, and organizations representing older persons, girls and women, and trans persons could further accelerate progress.</p>

57	IFIP International Federation for Information Processing	International Organization	Switzerland (Confederation of)	<p>A trend beginning in the 2000's is that we have left the static world to enter in the dynamic worldS. This change is very important and difficult to live through. Nothing is frozen yet and we have to adapt / adjust with adaptive situations to be found at all occasions. It's not easy to understand and accept especially when all your basic education was based in a static educational system.</p>	<p>I think there are too many action lines and in fact there are only three hyper-important action lines impacting all 17. Without SECURITY, EDUCATION and ETHICS the others do not exist and there is no possibility to have a real information society. We have to reinforce the thinking on and around these three incontournable components.</p>	<p>IFIP (International Federation for Information Processing) of course But to develop competencies we should also look in different forms (directions/components) like Consider five ways to approach competencies :</p> <ol style="list-style-type: none"> 1. Knowledge-based approach 2. Know-how approach 3. Approach through behavior and interpersonal skills 4. Approach through knowledge, know-how and interpersonal skills 5. Cognitive skills approach (knowing, dealing with information, knowing how to reason, knowing how to name what you do, knowing how to learn). <p>Don't forget diversities !</p>

26	UNU-EGOV	International Organization	Denmark	<p>Eliminating the digital divide: While the pandemic has accelerated the speed of the digital transformation globally, the digital divide is widening. With few exceptions, most international and national assessments continue to collect few or no indicators on gender or geographical equality. Without disaggregated data on gender, age, income and educational level, the digital inclusion of marginalised communities cannot be assessed over time and is of limited value for decision-makers to refine initiatives and target resources to specific communities. It is recommended that international stakeholders, Member States, and telco's collaborating to find innovative solutions to collect and share segmented data for four key dimensions: 1) Access to electricity, the internet, devices, and quality of that access; 2) Traditional and digital skills including critical thinking, literacy, and entrepreneurship; 3) Use of technology, public and private digital services, digital products and content, various types of work, social and civic engagement activities, as well as places of access to measure actual value creation and digital inclusion of</p>	<p>Mix physical and virtual presence to increase reach, accessibility, and level of inclusion. Consider having "live" in-session questions raised for the audience to "vote on" or "prioritise" with panels (high-level and workshops) to discuss the results. Online tools can be used.</p>

34	Oxfam International	International Organization	Kenya (Republic of)	ICT and digital spaces to empower women and enhance their status and contribution to the society	<p>A good moderator who is familiar with the subject could be helpful. In this way, the person can direct the discussion and ask key questions for panellists to share specific knowledge. In addition, please include representatives of local civil society organisations in online discussions. The composition of panels should be with diversity in terms of participants and levels/angles of their perspectives. WSIS should promote for the digital world to become a public space and make it safe for all. Nowadays, although democracy has been expanded in many countries, in some regions it has not been generalised. For example, in a society characterised by deeply embedded patriarchal social norms and oppressive totalitarian regimes, women are systematically controlled, placed under surveillance and instrumentalised. In some cases, digital platforms have presented an alternative space which has facilitated women's</p>

51	Geneva Centre of Humanitarian Studies	Academia	Switzerland (Confederation of)	<p>Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all With the covid 19 outbreak some traditional economic models had to evolve and change. We observed an exponential growth of online services and promotion of e-commerce, with “click and collect” solutions, and also home deliveries. The interesting part of this model is that the entry cost is reduced, since businesses actors do not need to engage costs in commercial loans and high levels of stocks. Nethertheless the challenge is linked to ICTs since all e-economy entrepreneurs must have access to robust internet access. Every country must expand broadband infrastructure and improve the quality of connectivity and resilience of networks. It could be interesting to have a round table and showcase some success stories which happened during the covid-19 crisis. It will convey hope, and show that some trends may be accelerated and facilitated out of a crisis. goal 4: ensure inclusive and equitable quality education and promote lifelong learning opportunities for all at all ages E-</p>	<p>As suggested in question 1, it would be interesting to organise a hackathon and to have an open discussion forum technical solution for people to contribute across the time period of the forum.</p>
----	---------------------------------------	----------	-----------------------------------	---	--

WSIS Forum 2021: Open Consultation Process

ANNEX: Submissions received pertaining to the themes and structure of the WSIS Forum 2021

				<p>learning in the time of covid-19 would also be highly interesting to present. In the past years with the apparition of MOOC, people tended to think that knowledge would be available for all and for free all around the globe. It was before realising the inequalities as far as connectivity was concerned.</p> <p>Besides, even in more developed countries, and Europe notably, it has been observed that home teaching during lock-down was increasing the education gap between social ranks, even if internet coverage and digital equipment were more balanced. It proves that technology without education is a concern.</p>	
--	--	--	--	--	--

WSIS Forum 2021: Open Consultation Process

ANNEX: Submissions received pertaining to the themes and structure of the WSIS Forum 2021

52	Oslo Metropolitan University	Academia	Norway	<p>I suggest two topics for the High-Level Segment of the WSIS Forum 2018. First, I suggest including a High-Level Segment on “Universal Design as an Approach for Sustainable Development”. Universal design is an approach to creating new technology that aims to ensure everyone can use the ICT product or service equally no matter their disability, age, ethnic identity, gender, or any other characteristic. This Segment would focus on how the principles of universal design, as articulated in the United Nations Convention on the Rights of Persons with Disabilities, can be adopted by technology developers, higher education institutions, and public sector organizations, and how technology transfer between the Global North and Global South can promote equal participation for everyone in society. Second, I suggest a High-Level Segment on “Gender-Inclusive Innovation in Sustainable Development”. Governments throughout the world are increasingly focusing on removing market barriers and promoting innovation and entrepreneurship in industry, academia, and the public sector.</p>	<p>Co-design and participatory design are two approaches commonly used in industry and academia to promote engagement with all stakeholders and communities of practice throughout research and development from ideation to implementation. Participatory and codesign processes involve collaborative exercises designed to actively involve stakeholders in creating new ideas and scenarios, which offer solutions to social challenges.</p>
----	------------------------------	----------	--------	---	--

WSIS Forum 2021: Open Consultation Process

ANNEX: Submissions received pertaining to the themes and structure of the WSIS Forum 2021

				<p>Gender-inclusive innovation and entrepreneurship focus on solving complex and persistent community-based challenges while maintaining economic sustainability. This Segment would cut across multiple levels including how government can incentivize and promote gender-inclusive innovation and entrepreneurship, how academia can facilitate gender-inclusive innovation and entrepreneurship using applied and action research methods, how market actors, including startups and established enterprises, can strategically redirect their business models to promote gender equality as well as economic value, and how multi-stakeholder partnerships, such as the EQUALS Global Partnership for Digital Gender Equality, can accelerate progress towards gender-inclusivity.</p>

58	IFT	Government	Mexico	<p>In the last year, the crisis generated by COVID-19 highlighted more than ever the need to connect the unconnected. On the one hand, connectivity allowed many people to continue with some of their most important activities, such as education, work, and government services. On the other hand, many people fell into situations of vulnerability because they were not able to take advantage of the benefits of digital connectivity. Therefore, one of the main issues on which the High Level segment should focus is how to connect the unconnected, through the mobilization of resources, the creation of new business models, the promotion of investment for the development, and the expansion of infrastructure. Another issue that needs to be analyzed is related to the promotion of a digital ecosystem through the adoption of new technologies and the promotion of security and trust in digital technologies. In addition, the development of digital skills and the creation of capacities will be necessary, so that the use of ICT can benefit societies.</p>	<p>In order to make the High Level Segments more dynamic and interactive, we suggest that the sessions maximize the dialogue among panelists, to strengthen ties of collaboration and to create new support networks. Also, it is necessary to allow more interaction with participants, leaving enough time for questions and answers from the public.</p>

			<p>partnerships between countries and promote global digital governance. In addition to the various national sectors between countries, it is also possible to explore digital collaboration between international public interest organizations, such as the public interest healthcare organizations under COVID-19, and public interest consultancies dedicated to providing advisory services to public interest organizations that can help them with their digital transformation. The panel discussion sessions of the Forum could include topics such as "Collaboration to face the risk of COVID-19 - Progress in inter-country research to combat the epidemic", "Vaccines and digital anti-COVID-19 products", "Escaping the economic dilemma - Digital transformation of enterprises under COVID-19", and "Building a digital international healthcare platform". The main topic can be a vision of the future, such as "How to solve problems together through international digital cooperation in the face of sudden world crises".</p>

80	UNESCO	International Organization	France	<p>Proposal for a High-Level Panel on Ethics of Artificial Intelligence</p> <p>Artificial intelligence (AI) is a frontline technology with profound implications for human beings, cultures, societies and the environment. While AI has the potential to be our ally in the struggle for a more equitable, fair, and sustainable future, it also poses significant risks and challenges, especially in terms of deepening the existing divides, exacerbating gender disparities, and infringing on human dignity and human rights. While AI is being developed and applied at an exponential rate, there is no global ethical framework to promote its beneficial use and to help mitigate its risks. However, this is about to change, as UNESCO was given the mandate by its Member States to elaborate the first global normative instrument in the field: the Recommendation on the Ethics of AI. The Recommendation aims to provide an anticipatory framework of values and principles to help mitigate future risks and offers concrete policy actions designed to resolve the emerging challenges. During this High-Level Panel, you will have a chance to hear leading voices</p>

88	UNCTAD	International Organization	Switzerland (Confederation of)	<p>Global and regional implications of COVID-19 - What Role can E-Business Play? The COVID-19 pandemic has accelerated digital transformations. Digital solutions are increasingly needed to continue some of the economic and social activities remotely. They have been critical for telemedicine, telework and online education, not least to keep alive our social ties in times of physical distancing. E-commerce has also been experiencing a spike in growth in developing countries, with long-term implications. However, unless adequately addressed, existing digital divides are likely to result in even greater inequalities. ICTs are at the core of the digital economy and are one of the seven policy areas identified by eTrade for all partners. The action line 7 on e-business contributes to targets in SDGs 1, 2, 5, 8, 9, and 17. A session at the WSIS Forum would allow us to offer a targeted dialogue to unveil its main findings at the global level complemented by the sharing of experiences at the regional level.</p>

100	Habitat Assocaition	Civil Society	Turkey	<p>2030 Agenda for Sustainable Development and the UNGA Overall WSIS Review says to the countries that in order to achieve a sustainable world and create resilient communities, the factors are depending and related to each other. In this term, civil society, local authorities and other stakeholders are very crucial to reach the communities and create the impacts but we can not ignore the rol of the governments and states. All the steps should become a public policy and implement as legislative regulation in each countries for a sustainable world. In that order, states’ role is very important in order to transfer the success stories and local achievements to the public policies. In this process, the main topics and themes which we are suggested for the high-level segment of the WSIS Forum 2021 are below; Ministries should be involved in order to find out the country regulations. Local authorities should be involved in order to observe the local achievements and differenet collaborations between public and other stakeholders; civil society, private sector etc. Success stories and projects should be</p>	<p>The topics and themes which suggested by us on the previous question can be implement with the methods below; Panel discussion with multi sectoral partners. E.g. public sector, civil society and private sector collaborations Workshops on the success projects. The workshop owner can offer to the participants the experiences of the projects which they put into practice Key note speech of the governments on their approach to the sustainable development and the steps which the took for the 2030 agenda.</p>
