The importance of the CEIR-EIR interface standardization

Mr. Evgeny Zababurin
Svyazcom LCC
zababurin@svyazcom.ru

www.wsis.org/forum

Brief information on interface

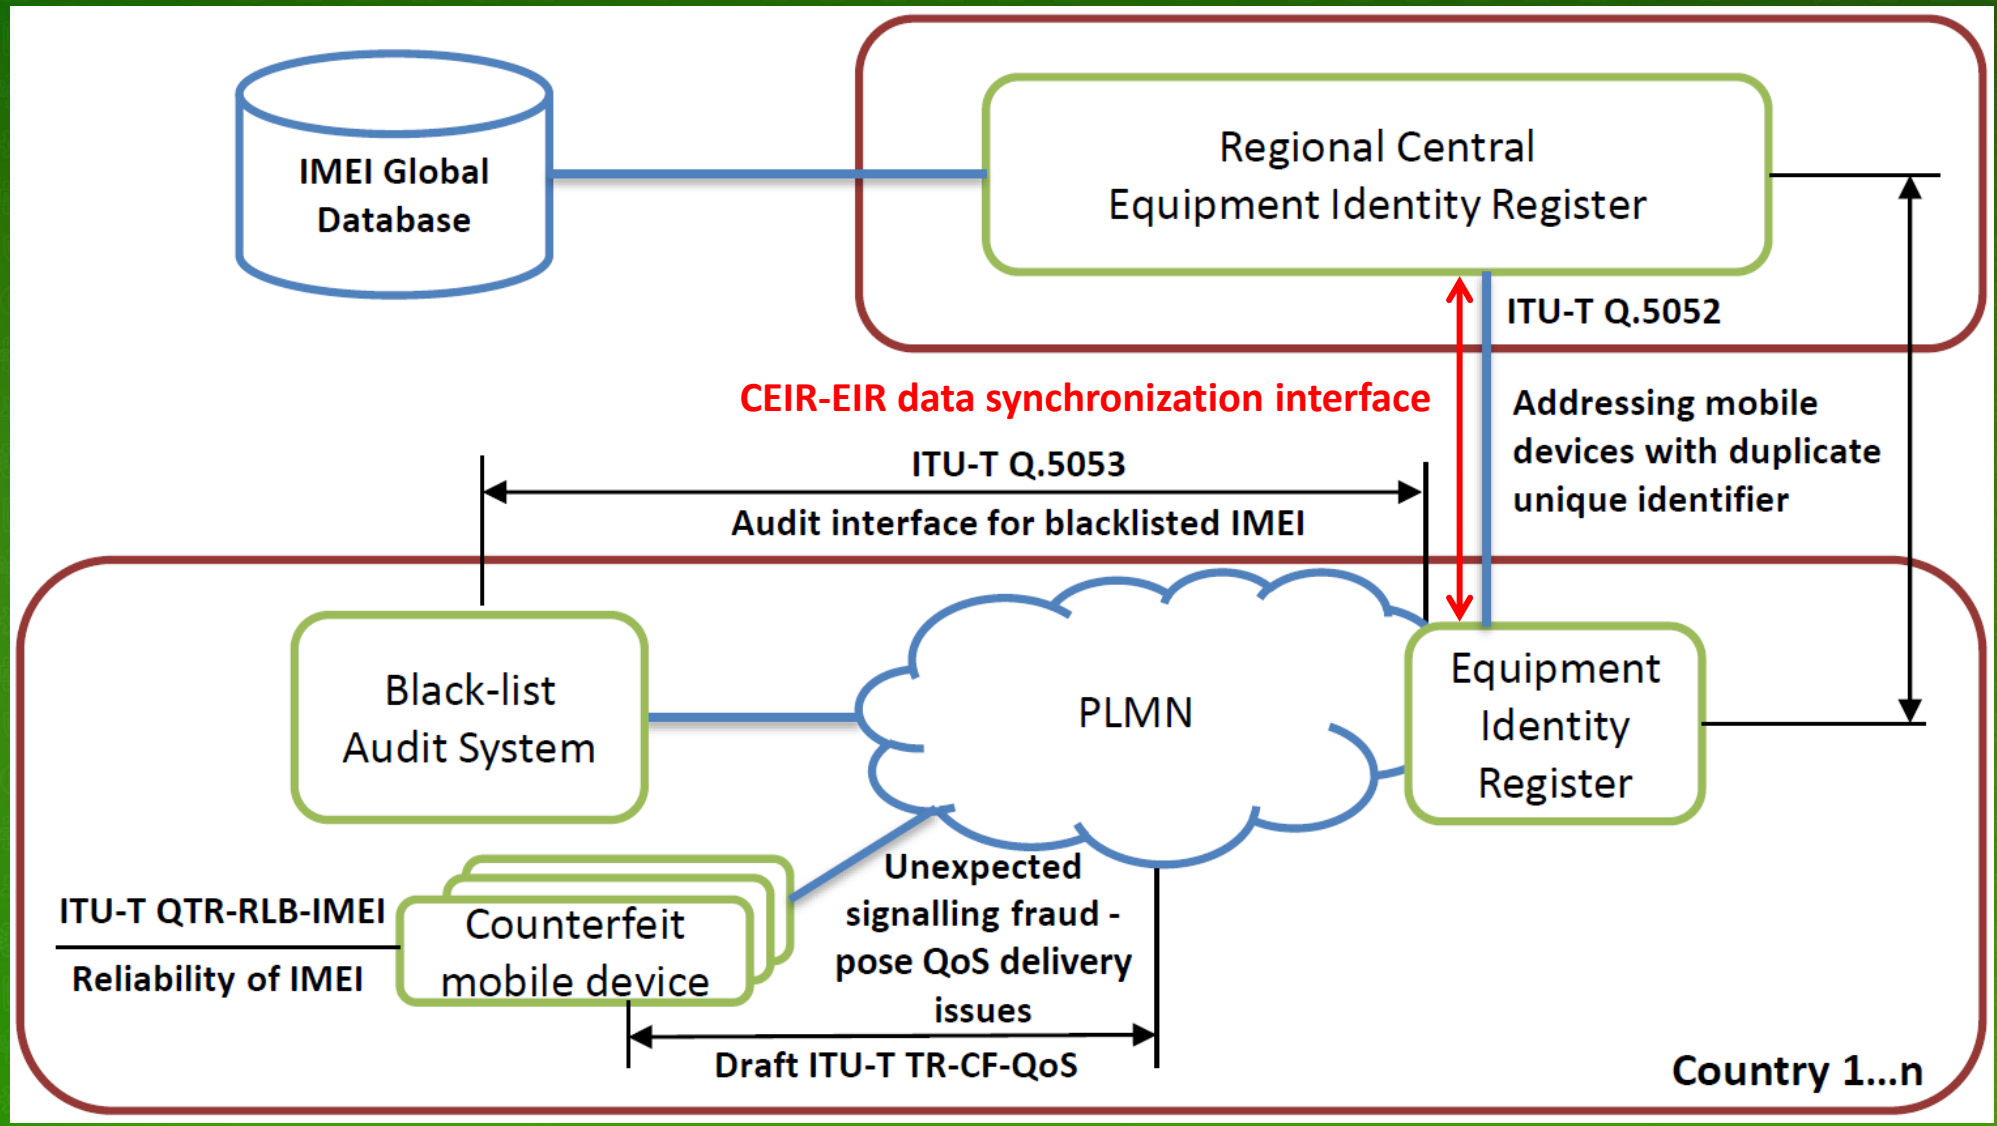
The industry requests to standardize the interface of data synchronization between telecommunications regulator (CEIR) and the mobile operators (EIR).

Such interface can be used for transferring:

- The lists (list changes) in both directions
- The IMEI registration events from EIRs to CEIR database
- Any other data needed for business processes

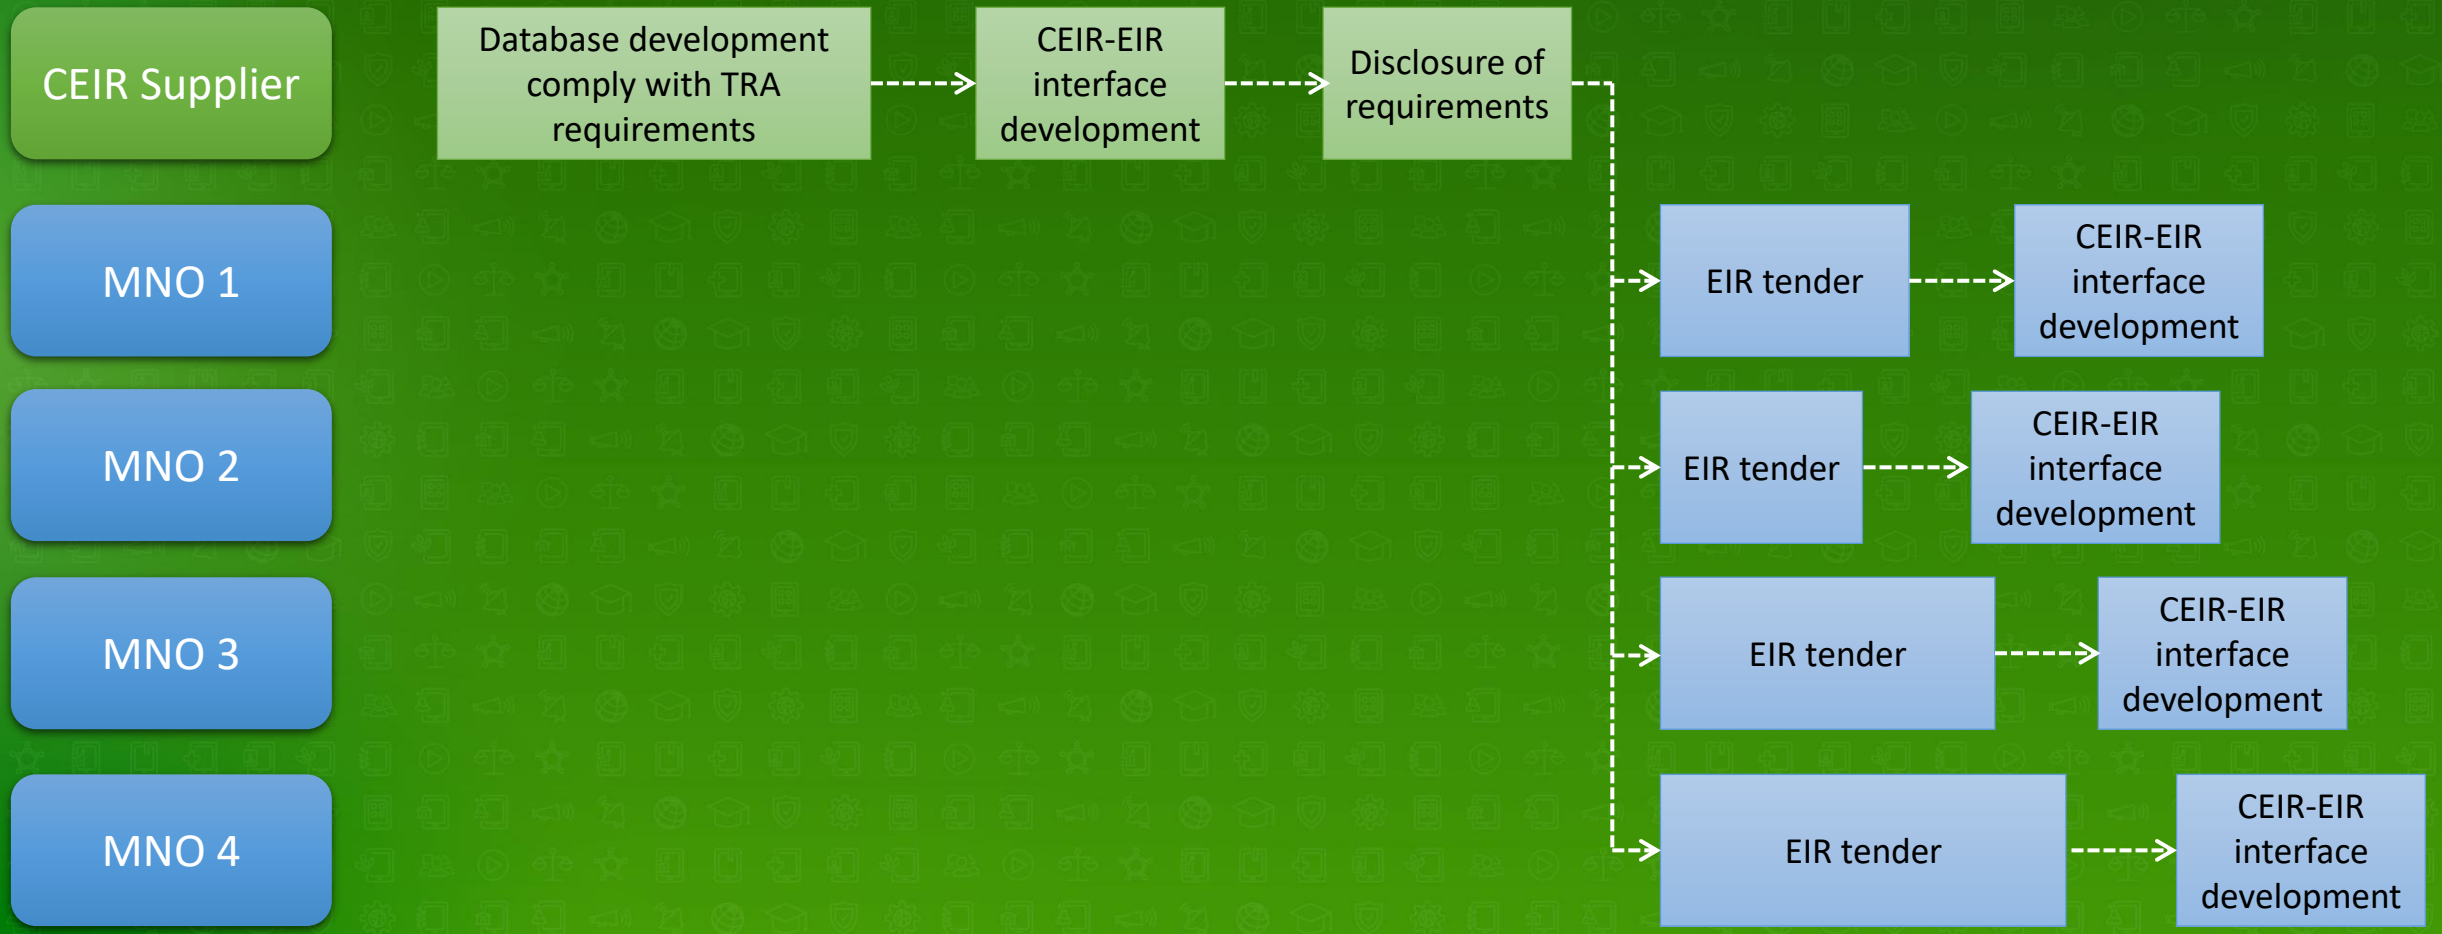
This interface must be flexibly configured according to requirements of each country.

The place of the proposed interface



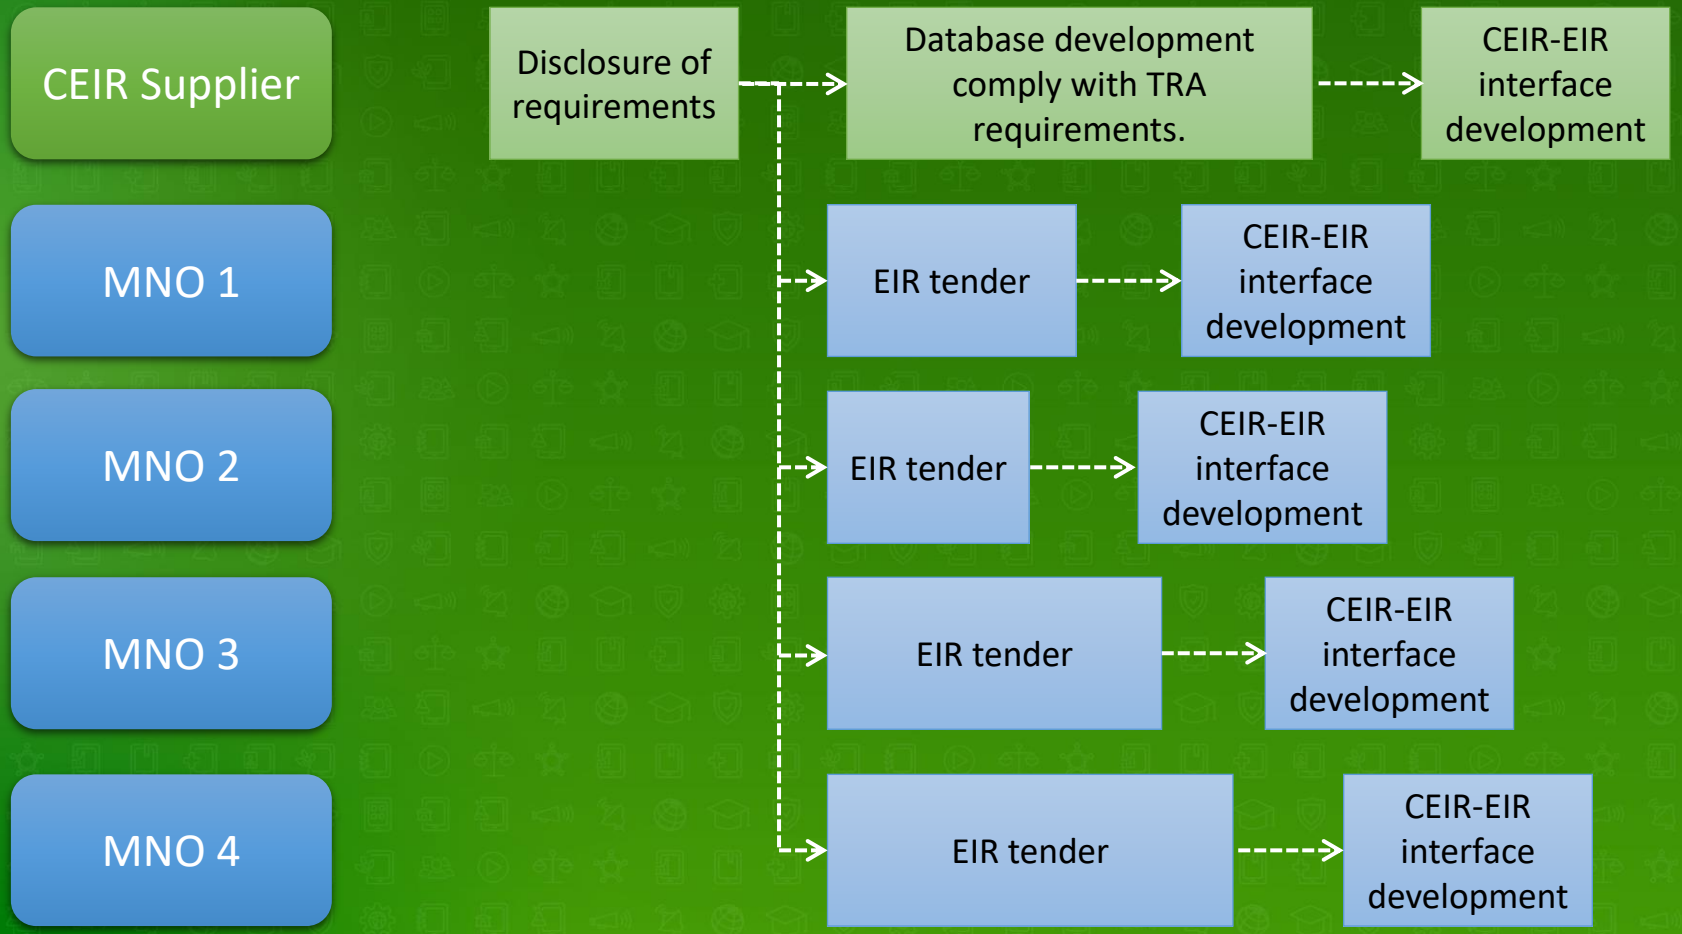
Impact of having a standard on interface

Timeline without standard



Impact of having a standard on interface

Timeline with standard



Introduction of standard interface can improve the timeline of CEIR project delivery by 40-50%.
