Sheffield Hallam University, Industry&Innovation Research Institute, United Kingdom

Filling Information Gaps in Big Data Modelling of Sustainable Development Goals

Mr. Giacomo Mazzone

Journalist, RAI – global coordinator project WBU – UNDRR

Teaching Resilience, Saving Lives

Elements of Information Management

The elements of Information Management are not only “pure” data but all facts

values, metainformation, methods, functions, processes, models, measures, principles,
expectations, actors and their sociology, documentation,
decisions, actions, effects and control

Consequences:

Enabling Operational Complexity, Improvement of Transparency,
Avoidance of Misinterpretation, Essentially speeding-up Alternatives and Decisions,
Support of Accountability

Participatory Inclusion of all Actor Groups in all Phases
leave no-one behind
