

Recommendation

ITU-T K.123 (2022) Cor. 1 (10/2022)

SERIES K: Protection against interference

Electromagnetic compatibility requirements for
electrical equipment in telecommunication
facilities

Corrigendum 1

CAUTION!
PREPUBLISHED RECOMMENDATION

This prepublication is an unedited version of a recently approved Recommendation. It will be replaced by the published version after editing. Therefore, there will be differences between this prepublication and the published version.

Recommendation ITU-T K.123

Electromagnetic compatibility requirements for electrical equipment in telecommunication facilities

Corrigendum 1

Summary

Figure 3 and Figure 4 in the Pre-published Recommendation ITU-T K.123 are as follows.

History

| Edition | Recommendation | Approval | Study Group | Unique ID* |
|---------|---------------------------|------------|-------------|---|
| 1.0 | ITU-T K.123 | 2016-12-14 | 5 | 11.1002/1000/13139 |
| 2.0 | ITU-T K.123 | 2019-07-14 | 5 | 11.1002/1000/13958 |
| 3.0 | ITU-T K.123 | 2022-08-13 | 5 | 11.1002/1000/15040 |
| 3.1 | ITU-T K.123 (2022) Cor. 1 | 2022-10-27 | 5 | 11.1002/1000/15228 |

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications, information and communication technologies (ICTs). The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure, e.g., interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had [not] received notice of intellectual property, protected by patents/software copyrights, which may be required to implement this Recommendation. However, implementers are cautioned that this may not represent the latest information and are therefore strongly urged to consult the appropriate ITU-T databases available via the ITU-T website at <http://www.itu.int/ITU-T/ipr/>.

Recommendation ITU-T K.123

Electromagnetic compatibility requirements for electrical equipment in telecommunication facilities

Corrigendum 1

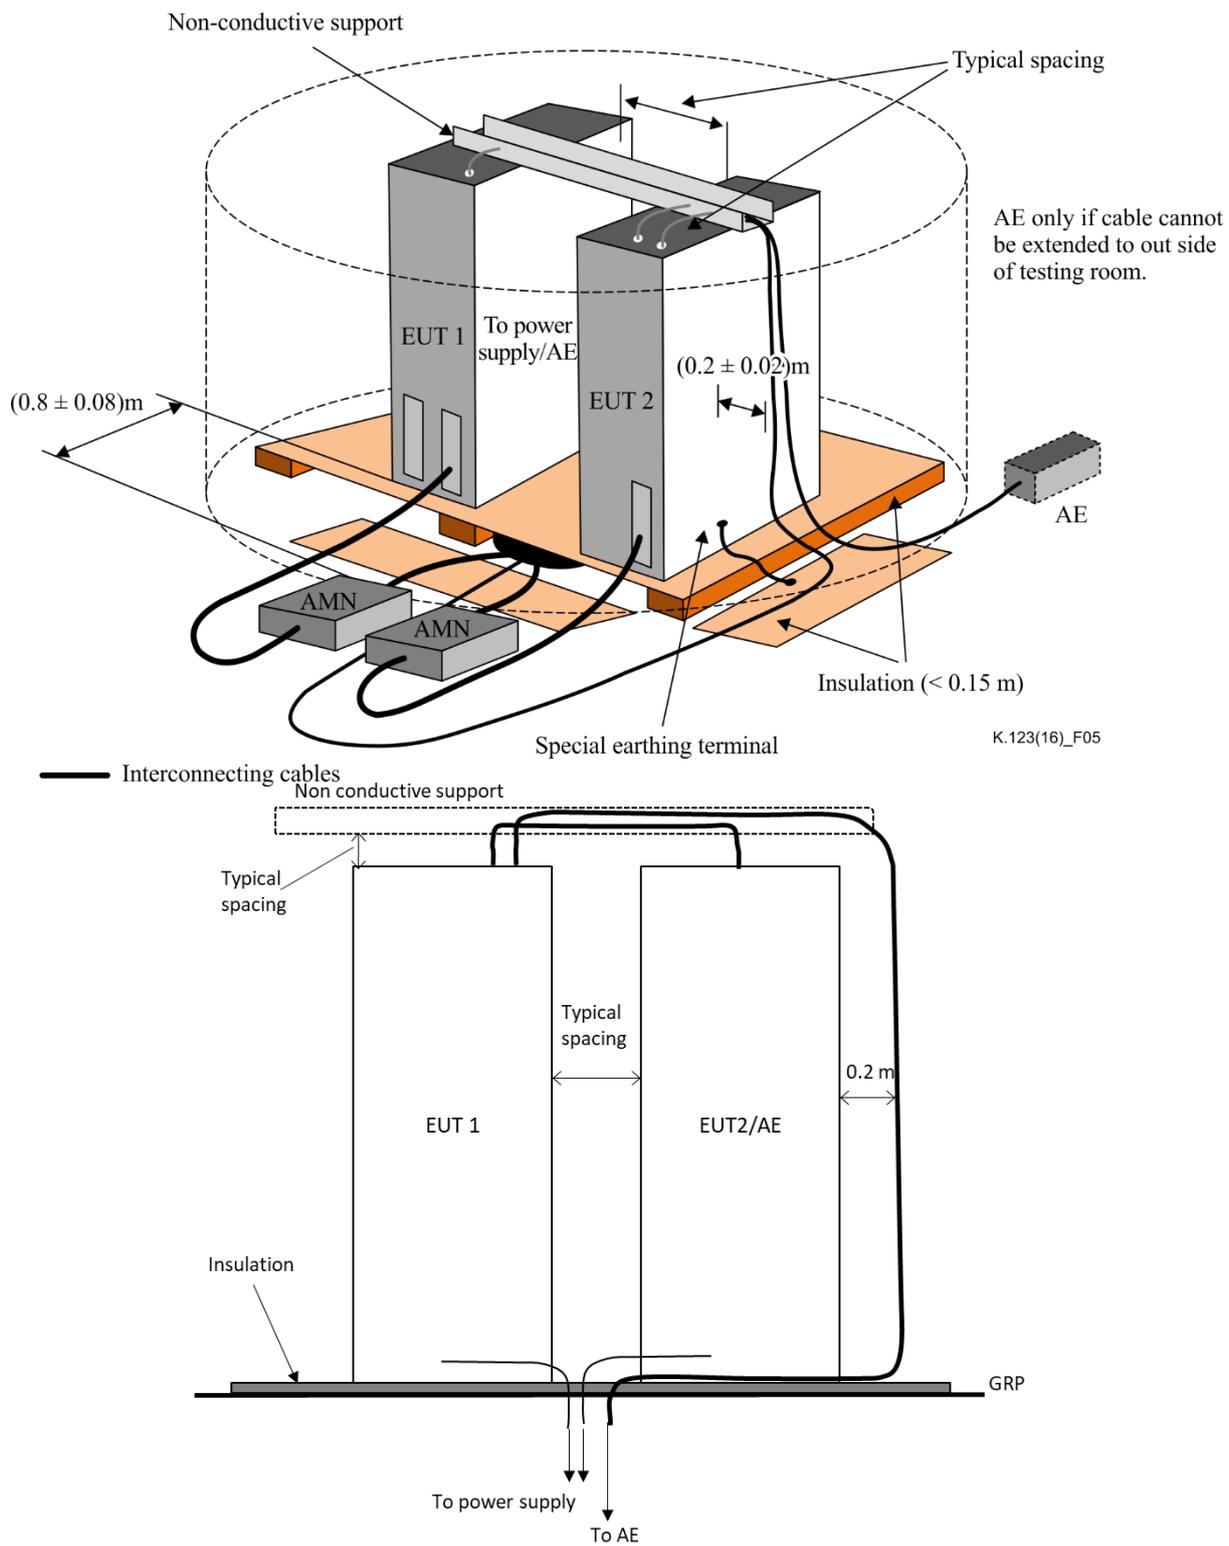

Figure 3 and Figure 4 in the Pre-published Recommendation ITU-T K.123 are as follows.

Modified from Fig. D.7 in [CISPR 32]

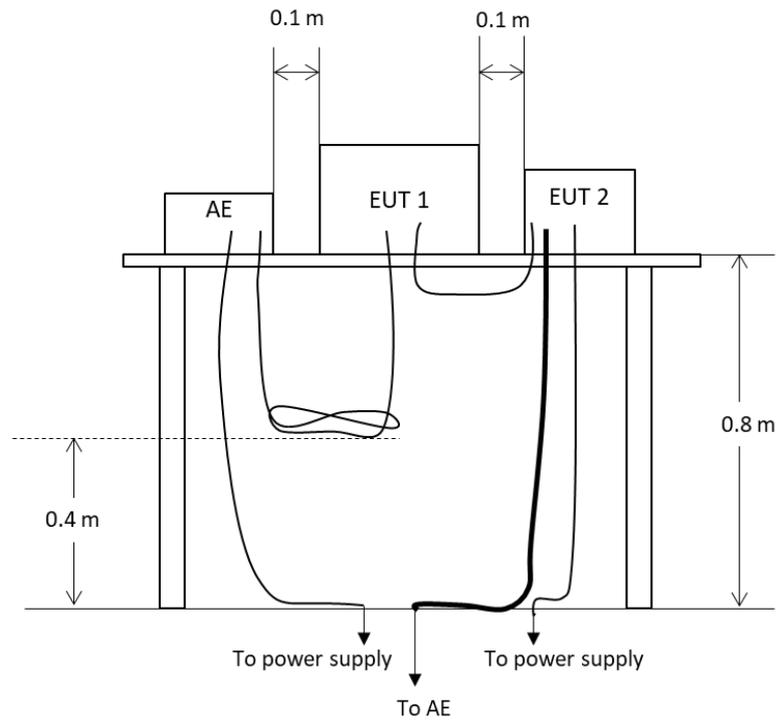

Figure 3 – Example of a typical setup for measurement of radiated disturbances from a table-top EUT

Modified from Fig. D.9 in [CISPR 32]

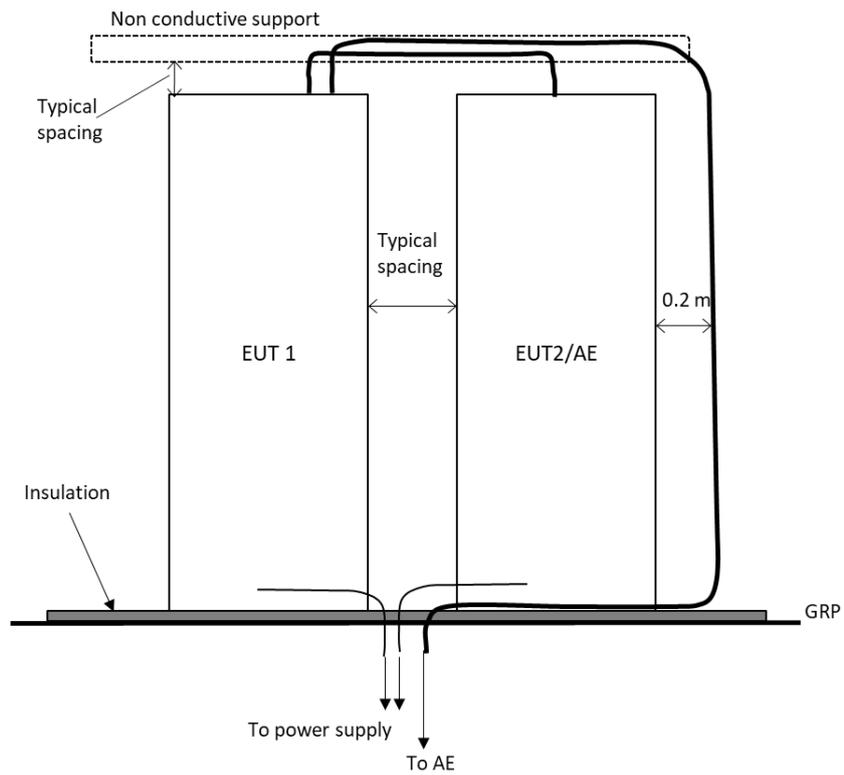

Figure 4 – Example of arrangement of floor-standing EUT for radiated emission measurement

Figure 3 and Figure 4 should read as follows.

Modified from Fig. D.7 in [CISPR 32]

Figure 3 – Example of a typical setup for measurement of radiated disturbances from a table-top EUT

Modified from Fig. D.9 in [CISPR 32]

Figure 4 – Example of arrangement of floor-standing EUT for radiated emission measurement
