SERIES M: TELECOMMUNICATION MANAGEMENT, INCLUDING TMN AND NETWORK MAINTENANCE

Telecommunications management network

Guidelines for Implementation Conformance Statement proformas for tML schemas
Corrigendum 1

ITU-T Recommendation M.3031 (2004) – Corrigendum 1

ITU-T Recommendation M.3031

Guidelines for Implementation Conformance Statement proformas for tML schemas

Corrigendum 1

Summary

This technical corrigendum corrects a defect identified in ITU-T Rec. M.3031 (2004). It includes a table providing the relation between the defect and the corrections. These corrections are specified as changes to existing clauses of ITU-T Rec. M.3031 (2004).

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure e.g. interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents, which may be required to implement this Recommendation. However, implementors are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database.

ITU-T Recommendation M.3031

Guidelines for Implementation Conformance Statement proformas for tML schemas

Corrigendum 1

This technical corrigendum corrects the following defects in ITU-T Rec. M.3031 (2004):

Defect number	Issue	Correction No.
	The schema in Annex A is, to some extent, inconsistent with the SICS proformas.	a), b)

Modify clause A.1 "tML schema definition"

a)   *Replace the following tML schema line:*

```
<xsd:element name="name" type="xsd:string" nillable="true"/>
```

with the following lines, for consistency with the contents in SICS proformas in clause A.2:

```
<xsd:element name="name" nillable="true">
  <xsd:complexType>
    <xsd:choice>
      <xsd:element ref="tML:metar"/>
      <xsd:element ref="tML:name"/>
    </xsd:choice>
  </xsd:complexType>
</xsd:element>
<xsd:element name="metar" type="xsd:decimal"/>
```

b)   *Replace the fixed value* `"dwl88"` *in the tML schema specification with* `"bj88"` *for consistency with the contents in SICS proformas in clause A.2.*

SERIES OF ITU-T RECOMMENDATIONS

Series A	Organization of the work of ITU-T
Series D	General tariff principles
Series E	Overall network operation, telephone service, service operation and human factors
Series F	Non-telephone telecommunication services
Series G	Transmission systems and media, digital systems and networks
Series H	Audiovisual and multimedia systems
Series I	Integrated services digital network
Series J	Cable networks and transmission of television, sound programme and other multimedia signals
Series K	Protection against interference
Series L	Construction, installation and protection of cables and other elements of outside plant
Series M	**Telecommunication management, including TMN and network maintenance**
Series N	Maintenance: international sound programme and television transmission circuits
Series O	Specifications of measuring equipment
Series P	Telephone transmission quality, telephone installations, local line networks
Series Q	Switching and signalling
Series R	Telegraph transmission
Series S	Telegraph services terminal equipment
Series T	Terminals for telematic services
Series U	Telegraph switching
Series V	Data communication over the telephone network
Series X	Data networks, open system communications and security
Series Y	Global information infrastructure, Internet protocol aspects and next-generation networks
Series Z	Languages and general software aspects for telecommunication systems
