Geneva, 24 August 2006

ITU – TELECOMMUNICATION STANDARDIZATION SECTOR

**Subject: Erratum 1 (08/2006) to**

ITU-T Recommendation Q.50 (07/2001), *Signalling between Circuit Multiplication Equipment (CME) and International Switching Centres (ISC)*

*In clause B.2 "Physical level of interface", correct the third paragraph as follows:*

Since the connected ISC has only 2 Mbit/s interfaces, Time Slot (TS) 16 of these 2 Mbit/s PCM-systems is used in the manner described in [3.3.3.2.25.1.3.2.2/G.704](#). (In principle, any other physical interface with  $2 \times 2$  bits is suitable for the forward and backward directions.)
