

COVERING NOTE

GENERAL SECRETARIAT INTERNATIONAL TELECOMMUNICATION UNION

Subject: ITU-T Q.724 Amendment 1 (03/93)

Geneva, 5 November 2001

TELECOMMUNICATION
STANDARDIZATION SECTOR
OF ITU

ITU-T Recommendation Q.724 (1988)

Telephone user part signalling procedures

i) Clause 1.4/Q.724:

Replace: "When an initial address message is received ... ii) when continuity-check requests are received"

by: "When an initial address message is received with a request for a continuity-check, a continuity check loop is connected."

ii) SDL Figure 8/Q.724, sheet 2: *delete* the output "stop T11" following the expiration of T13.

iii) End of 1.15.1, item c): *add* the following text:

"From the point of view of these procedures, circuits served by the Telephone User Part are always considered to be both-way. If a circuit is used one-way only, then this is for the purpose of traffic control and has no bearing on the operation of the protocol."

iv) Subclause 7.2.3 *add* the following note:

"To avoid difficulties on digital transmission links, the frequency of the equipment should not be tuned on 2000 Hz."
