

COVERING NOTE

GENERAL SECRETARIAT INTERNATIONAL TELECOMMUNICATION UNION

Subject: CORRIGENDUM No. 1

Geneva, 9 May 2001

Recommendation ITU-T T.38 (06/98)

TELECOMMUNICATION
STANDARDIZATION SECTOR
OF ITU

ITU-T Recommendation T.38 (06/98)

Procedures for real-time Group 3 facsimile communication over IP networks

In Annex A, the following ASN.1 sequence replaces the sequence currently used for "SEQUENCE OF SEQUENCE":

```
Data-Field ::= SEQUENCE OF SEQUENCE
{
    field-type ENUMERATED
    {
        hdlc-data,
        hdlc-sig-end,
        hdlc-fcs-OK,
        hdlc-fcs-BAD,
        hdlc-fcs-OK-sig-end,
        hdlc-fcs-BAD-sig-end,
        t4-non-ecm-data,
        t4-non-ecm-sig-end,
        ...
    },
    field-data OCTET STRING (SIZE(1..65535)) OPTIONAL
}
```

The changes with respect to the current version are:

- a) a comma has been added at the end of the line "t4-non-ecm-sig-end";
- b) a line containing an ellipsis has been added following the line of a) above.
