X.34

Corrigendum 1
(03/2000)

SERIES X: DATA NETWORKS AND OPEN SYSTEM
COMMUNICATIONS

Public data networks – Interfaces

Access to packet switched data transmission
services via B-ISDN

Corrigendum 1

ITU-T Recommendation X.34 – Corrigendum 1

(Formerly CCITT Recommendation)

ITU-T X-SERIES RECOMMENDATIONS
DATA NETWORKS AND OPEN SYSTEM COMMUNICATIONS

PUBLIC DATA NETWORKS	
Services and facilities	X.1–X.19
Interfaces	X.20–X.49
Transmission, signalling and switching	X.50–X.89
Network aspects	X.90–X.149
Maintenance	X.150–X.179
Administrative arrangements	X.180–X.199
OPEN SYSTEMS INTERCONNECTION	
Model and notation	X.200–X.209
Service definitions	X.210–X.219
Connection-mode protocol specifications	X.220–X.229
Connectionless-mode protocol specifications	X.230–X.239
PICS proformas	X.240–X.259
Protocol Identification	X.260–X.269
Security Protocols	X.270–X.279
Layer Managed Objects	X.280–X.289
Conformance testing	X.290–X.299
INTERWORKING BETWEEN NETWORKS	
General	X.300–X.349
Satellite data transmission systems	X.350–X.369
IP-based networks	X.370–X.399
MESSAGE HANDLING SYSTEMS	X.400–X.499
DIRECTORY	X.500–X.599
OSI NETWORKING AND SYSTEM ASPECTS	
Networking	X.600–X.629
Efficiency	X.630–X.639
Quality of service	X.640–X.649
Naming, Addressing and Registration	X.650–X.679
Abstract Syntax Notation One (ASN.1)	X.680–X.699
OSI MANAGEMENT	
Systems Management framework and architecture	X.700–X.709
Management Communication Service and Protocol	X.710–X.719
Structure of Management Information	X.720–X.729
Management functions and ODMA functions	X.730–X.799
SECURITY	X.800–X.849
OSI APPLICATIONS	
Commitment, Concurrency and Recovery	X.850–X.859
Transaction processing	X.860–X.879
Remote operations	X.880–X.899
OPEN DISTRIBUTED PROCESSING	X.900–X.999

For further details, please refer to the list of ITU-T Recommendations.

ITU-T Recommendation X.34

Access to packet switched data transmission services via B-ISDN

CORRIGENDUM 1

Source

Corrigendum 1 to ITU-T Recommendation X.34 was prepared by ITU-T Study Group 7 (1997-2000) and approved under the WTSC Resolution 1 procedure on 31 March 2000.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Conference (WTSC), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSC Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents, which may be required to implement this Recommendation. However, implementors are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database.

ITU-T Recommendation X.34

Access to packet switched data transmission services via B-ISDN

CORRIGENDUM 1

1) Clause 2 References

- a) *Delete reference [5] to ITU-T Recommendation I.362.*

Rationale: ITU-T I.362 was deleted in Study Group 13.

- b) *Replace the reference to ITU-T I.363, as follows:*

ITU-T Recommendation I.363.5 (1996) – *B-ISDN ATM adaptation layer AAL specification Type 5 AAL*.

Rationale: ITU-T I.363 was separated for each AAL protocol in Study Group 13. Among them, Type 5 AAL is the only one relevant to ITU-T X.78.

2) Clause 5 General service aspects

Replace bullet c):

This Recommendation defines the procedures at the user-network interface of a B-ISDN to access packet switched data transmission services provided by a PSPDN or an ISDN in alignment with Recommendations I.432, I.361, I.362, I.363, Q.2110 and Q.2130.

with:

This Recommendation defines the procedures at the user-network interface of a B-ISDN to access packet switched data transmission services provided by a PSPDN or an ISDN in alignment with ITU-T I.432, I.361, I.363.5, Q.2110 and Q.2130.

Rationale: See clause 1.

3) Clause 6 Reference configuration

Replace:

NOTE 1 – ATM capabilities are in accordance with Recommendations I.361, I.362, I.363, I.432, Q.2110 and Q.2130 for TEs/TAs attached to a B-ISDN.

with:

NOTE 1 – ATM capabilities are in accordance with ITU-T I.361, I.363.5, I.432, Q.2110 and Q.2130 for TEs/TAs attached to a B-ISDN.

Rationale: ITU-T I.362 was deleted in Study Group 13.

4) Table in Annex A

- a) *Delete the row **Q.2931 cause, Code 10**.*

Rationale: No existing Recommendation defines this cause.

- b) *In the row **Q.2931 cause, Code 51**, change Code 51 to Code 37.*

Rationale: Alignment with ITU-T Q.2610.

- c) *In the row **Q.2931 cause, Code 93**, change Code 93 to Code 73.*

Rationale: In this table, Q.2931 cause, Code 93 appears twice with different explanations. 6.4.5/Q.2931 defines Code 73 as "Unsupported combination of traffic parameters", and Code 93 as "AAL parameters cannot be supported". This corrects a typographical error.

SERIES OF ITU-T RECOMMENDATIONS

Series A	Organization of the work of ITU-T
Series B	Means of expression: definitions, symbols, classification
Series C	General telecommunication statistics
Series D	General tariff principles
Series E	Overall network operation, telephone service, service operation and human factors
Series F	Non-telephone telecommunication services
Series G	Transmission systems and media, digital systems and networks
Series H	Audiovisual and multimedia systems
Series I	Integrated services digital network
Series J	Transmission of television, sound programme and other multimedia signals
Series K	Protection against interference
Series L	Construction, installation and protection of cables and other elements of outside plant
Series M	TMN and network maintenance: international transmission systems, telephone circuits, telegraphy, facsimile and leased circuits
Series N	Maintenance: international sound programme and television transmission circuits
Series O	Specifications of measuring equipment
Series P	Telephone transmission quality, telephone installations, local line networks
Series Q	Switching and signalling
Series R	Telegraph transmission
Series S	Telegraph services terminal equipment
Series T	Terminals for telematic services
Series U	Telegraph switching
Series V	Data communication over the telephone network
Series X	Data networks and open system communications
Series Y	Global information infrastructure and Internet protocol aspects
Series Z	Languages and general software aspects for telecommunication systems
