CCITT Recommendation X.701/Corr. 1

Superseded by a more recent version

Superseded by a more recent version

Foreword

ITU (International Telecommunication Union) is the United Nations Specialized Agency in the field of telecommunications. The CCITT (the International Telegraph and Telephone Consultative Committee) is a permanent organ of the ITU. Some 166 member countries, 68 telecom operating entities, 163 scientific and industrial organizations and 39 international organizations participate in CCITT which is the body which sets world telecommunications standards (Recommendations).

The approval of Recommendations by the members of CCITT is covered by the procedure laid down in CCITT Resolution No. 2 (Melbourne, 1988). In addition, the Plenary Assembly of CCITT, which meets every four years, approves Recommendations submitted to it and establishes the study programme for the following period.

In some areas of information technology, which fall within CCITT's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC. The text of CCITT Recommendation X.701 was approved on 17th January 1992. Technical Corrigendum 1 was approved on 18 February 1994. The identical text is also published as ISO/IEC International Standard 10040.

CCITT NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized private operating agency.

TECHNICAL CORRIGENDUM 1

Subclause A.2.4

In the first sentence, insert the word “optionally” before the words “followed by the EXTERNAL data supplied for SMASE.”.

Add a new sentence to the end of A.2.4:

“The abstract syntax name specified in A.3.4, shall be included in the Presentation Context Definition List.”

Subclause A.4.1

Delete the words “generating and/or”.
