

# COVERING NOTE

---

GENERAL SECRETARIAT OF THE INTERNATIONAL TELECOMMUNICATION UNION

---

Geneva, 19 February 2016

ITU – TELECOMMUNICATION STANDARDIZATION SECTOR

**Subject: Erratum 1 (02/2016) to Recommendation ITU-T G.997.1 (06/2012),  
*Physical layer management for digital subscriber line transceivers***

Correct the indentation of the fourth bullet item in clause 7.2.7.13 to read:

- SES-L, SES-LFE, ES-L, ES-LFE, LOSS-L and LOSS-LFE counters shall be inhibited only during unavailable time even if the unavailable time is declared retroactively.

NOTE – An implementation may count the SES-L, ES-L and LOSS-L during the contiguous SES-L leading to the declaration of UAS-L and subtract them at the onset of the declaration of UAS-L. The same may apply for the LOSS-LFE. See illustration in Figure 4 of [b-ITU-T M.2100].
