ITU-T Recommendation E.112

(Extract from the *Blue Book*)

NOTES

1 ITU-T Recommendation E.112 was published in Fascicle II.2 of the *Blue Book*. This file is an extract from the *Blue Book*. While the presentation and layout of the text might be slightly different from the *Blue Book* version, the contents of the file are identical to the *Blue Book* version and copyright conditions remain unchanged (see below).

2 In this Recommendation, the expression “Administration” is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Recommendation E.112

ARRANGEMENTS TO BE MADE FOR CONTROLLING THE TELEPHONE SERVICES BETWEEN TWO COUNTRIES

Administrations shall agree among themselves upon the operating methods best suited to the needs of the international relations which concern them, taking into account the conditions and the possibilities of operation.

In controlling the organization of the telephone service in a given relation, Administrations might forego the conclusion of formal agreements signed by the heads of Administrations, as there is no need for such agreements in relations where the provisions of the *Telephone Regulations* [1] are mutually and fully accepted. On the following major points agreement can be reached by correspondence:

- *Date on which the relation is to be opened.*
- *Means used to provide the connection:*
 - direct (transit) circuit;
 - passage through a transit exchange;
 - transit country or countries concerned.
- *Classes of call admitted* (List the classes of call and other media of communication, i.e., phototelegraph calls, programme transmissions and television transmissions).
- *Information:* Specify the provisions adopted to permit the exchange of lists of the principal local networks with all the information necessary for routing and accounting of calls.
- *Charging and accounting.*
