#### **Recommendation F.65**

#### TIME-TO-ANSWER BY OPERATORS AT INTERNATIONAL TELEX POSITIONS

The CCITT,

### considering

- (a) that a rapid answer to calling signals by the operators at incoming international telex positions is essential to ensure a rapid telex service;
  - (b) that a rapid answer is a very important factor in the efficient utilization of international telex circuits;
  - (c) that the time-to-answer has a direct effect on the costs of staffing and of switchboard provision;

## unanimously declares

that, wherever possible, Administrations should give priority to the answering of incoming calling signals at international terminal exchanges and should endeavour to ensure that 95% of calls are answered within 30 seconds.
