## **RECOMENDACIÓN UIT-T G.854.3**

### **PUNTO DE VISTA COMPUTACIONAL PARA LA GESTIÓN DE TOPOLOGÍAS**

#### **Resumen**

La comunidad de gestión de topología se utiliza para gestionar la topología de un dominio de red de capa y las relaciones entre los recursos del dominio de red de capa que se está gestionando. El servicio proporcionado por la comunidad permite la creación y supresión de los siguientes recursos dentro del dominio de red de capa: subred, enlace, enlace topológico, extremo de enlace, extremo de enlace topológico y grupo de acceso. El servicio proporciona también un conjunto de acciones de informe para poner en conocimiento de los posibles receptores de notificaciones la creación y la supresión de recursos en la comunidad. El servicio está disponible entre un solo llamante y un solo proveedor.

La partición de subredes y enlaces no están comprendidas en esta comunidad.

Esta especificación abarca las siguientes acciones de la comunidad de empresa:

- crear grupo de acceso;
- suprimir grupo de acceso;
- crear enlace;
- suprimir enlace;
- crear extremo de enlace;
- suprimir extremo de enlace;
- crear subred;
- suprimir subred;
- crear enlace topológico;
- suprimir enlace topológico;
- crear extremo de enlace topológico;
- suprimir extremo de enlace topológico;
- informar creación de grupo de acceso;
- informar supresión de grupo de acceso;
- informar creación de enlace;
- informar supresión de enlace;
- informar creación de extremo de enlace;
- informar supresión de extremo de enlace;
- informar creación de subred;
- informar supresión de subred;
- informar creación de enlace topológico;
- informar supresión de enlace topológico;
- informar creación de extremo de enlace topológico;
- informar supresión de extremo de enlace topológico.

#### **Orígenes**

La Recomendación UIT-T G.854.3 ha sido preparada por la Comisión de Estudio 4 (1997-2000) del UIT-T y fue aprobada por el procedimiento de la Resolución N.º 1 de la CMNT el 26 de marzo de 1999.

## PREFACIO

La UIT (Unión Internacional de Telecomunicaciones) es el organismo especializado de las Naciones Unidas en el campo de las telecomunicaciones. El UIT-T (Sector de Normalización de las Telecomunicaciones de la UIT) es un órgano permanente de la UIT. Este órgano estudia los aspectos técnicos, de explotación y tarifarios y publica Recomendaciones sobre los mismos, con miras a la normalización de las telecomunicaciones en el plano mundial.

La Conferencia Mundial de Normalización de las Telecomunicaciones (CMNT), que se celebra cada cuatro años, establece los temas que han de estudiar las Comisiones de Estudio del UIT-T, que a su vez producen Recomendaciones sobre dichos temas.

La aprobación de Recomendaciones por los Miembros del UIT-T es el objeto del procedimiento establecido en la Resolución N.<sup>o</sup> 1 de la CMNT.

En ciertos sectores de la tecnología de la información que corresponden a la esfera de competencia del UIT-T, se preparan las normas necesarias en colaboración con la ISO y la CEI.

## NOTA

En esta Recomendación, la expresión *empresa de explotación reconocida (EER)* designa a toda persona, compañía, empresa u organización gubernamental que explote un servicio de correspondencia pública. Los términos *Administración*, *EER* y *correspondencia pública* están definidos en la *Constitución de la UIT (Ginebra, 1992)*.

## PROPIEDAD INTELECTUAL

La UIT señala a la atención la posibilidad de que la utilización o aplicación de la presente Recomendación suponga el empleo de un derecho de propiedad intelectual reivindicado. La UIT no adopta ninguna posición en cuanto a la demostración, validez o aplicabilidad de los derechos de propiedad intelectual reivindicados, ya sea por los miembros de la UIT o por terceros ajenos al proceso de elaboración de Recomendaciones.

En la fecha de aprobación de la presente Recomendación, la UIT no ha recibido notificación de propiedad intelectual, protegida por patente, que puede ser necesaria para aplicar esta Recomendación. Sin embargo, debe señalarse a los usuarios que puede que esta información no se encuentre totalmente actualizada al respecto, por lo que se les insta encarecidamente a consultar la base de datos sobre patentes de la TSB.

## **Recomendación G.854.3**

### **PUNTO DE VISTA COMPUTACIONAL PARA LA GESTIÓN DE TOPOLOGÍAS**

*(Ginebra, 1999)*

#### **1 Alcance**

Esta especificación del punto de vista computacional está relacionada con la especificación de empresa de gestión de topología definida en la Recomendación G.852.3 y la especificación de información de gestión de topología definida en la Recomendación G.853.3.

#### **2 Referencias**

Las siguientes Recomendaciones del UIT-T y otras referencias contienen disposiciones que, mediante su referencia en este texto, constituyen disposiciones de la presente Recomendación. Al efectuar esta publicación, estaban en vigor las ediciones indicadas. Todas las Recomendaciones y otras referencias son objeto de revisiones por lo que se preconiza que los usuarios de esta Recomendación investiguen la posibilidad de aplicar las ediciones más recientes de las Recomendaciones y otras referencias citadas a continuación. Se publica periódicamente una lista de las Recomendaciones UIT-T actualmente vigentes.

- [1] Recomendación UIT-T G.851.1 (1996), *Gestión de la red de transporte – Aplicación del marco del modelo de referencia de procesamiento distribuido abierto*.
- [2] Recomendación UIT-T G.853.1 (1999), *Elementos comunes del punto de vista de la información para la gestión de una red de transporte*.
- [3] Recomendación UIT-T G.852.3 (1999), *Punto de vista de la empresa para la gestión de topologías*.
- [4] Recomendación UIT-T G.853.3 (1999), *Punto de vista de la información para la gestión de topologías*.

#### **3 Definiciones**

Ninguna.

#### **4 Abreviaturas**

En esta Recomendación se utilizan las siguientes siglas.

AG	Grupo de acceso ( <i>access group</i> )
ASN.1	Notación de sintaxis abstracta uno ( <i>abstract syntax notation one</i> )
CTP	Punto de terminación de la conexión ( <i>connection termination point</i> )
Id	Identificador
Ifce	Interfaz ( <i>interface</i> )
inv	invariante
layerND	Dominio capa de red ( <i>layer network domain</i> )

LE	Extremo de enlace ( <i>link end</i> )
LND	Dominio capa de red ( <i>layer network domain</i> )
NTTP	Punto de terminación de camino de red ( <i>network trail termination point</i> )
RM-ODP	Modelo de referencia de procesamiento distribuido abierto ( <i>reference model for open distributed processing</i> )
SN	Subred ( <i>subnetwork</i> )
SNC	Conexión de subred ( <i>subnetwork connection</i> )
SNTP	Punto de terminación de subred ( <i>subnetwork termination point</i> )
TL	Enlace topológico ( <i>topological link</i> )
TLE	Extremo de enlace topológico ( <i>topological link end</i> )
topman	gestión de topologías ( <i>topology management</i> )
TP	Punto de terminación ( <i>termination point</i> )
TPP	Punto de terminación de camino ( <i>trail termination point</i> )
UIT	Unión Internacional de Telecomunicaciones

## 5 Convenios

Para facilitar la comprensión del comportamiento de las operaciones:

- los parámetros se escriben en **negrita**;
- los elementos definidos en la especificación de información se escriben en *cursiva*.

## 7 Interfaces

Esta especificación no define operaciones que cambian la userLabel de los recursos o informan de este cambio al receptor de la notificación, porque tales operaciones no cambian el estado del sistema. Su firma exacta será desarrollada como parte de la especificación del punto de vista de la ingeniería, con la tecnología pertinente.

### 7.1 Interfaces de indagación

Esta especificación hace referencia a interfaces que permiten tener acceso a la identificación y propiedades de recursos que forman parte de la comunidad de "gestión de topologías". Puesto que la invocación de operaciones contenidas no modifica ningún estado, no hay interés en desarrollarlas explícitamente. Su firma exacta será desarrollada como parte del punto de vista de la ingeniería, con la tecnología pertinente. Estas interfaces se indican en el siguiente cuadro junto con la información a que dan acceso.

Nombre de interfaz	Objeto de información	Atributos y relaciones
topmanAccessGroupQueryIfce	<topmanAccessGroup>	<resourceId> <signalIdentification> <topologicalEndDirection> <userLabel> <accessGroupIsMadeOfNetworkTTPs, ROLE: elementTTP> <linkBinds, ROLE: transferCapacityLink> <layerNetworkDomainIsMadeOf, ROLE: containerLND>
topmanLayerNetworkDomainQueryIfce	<topmanLayerNetworkDomain>	<resourceId> <signalIdentification> <layerNetworkDomainIsMadeOf, ROLE: element>
topmanLinkEndQueryIfce	<topmanLinkEnd>	<resourceId> <signalIdentification> <topologicalEndDirection> <userLabel> <layerNetworkDomainIsMadeOf, ROLE: containerLND> <linkEndIsBoundTo, ROLE: topologicalEntity> <linkEndHasNetworkCTPs, ROLE: elementCTP>
topmanLinkQueryIfce	<topmanLink>	<resourceId> <signalIdentification> <linkDirectionality> <userLabel> <linkBinds, ROLE: a_endTopological, ROLE: z_endTopological> <layerNetworkDomainIsMadeOf, ROLE: containerLND> <linkHasLinkConnections, ROLE: elementLC>
topmanNetworkTTPQueryIfce	<topmanNetworkTTP>	<resourceId> <signalIdentification> <subnetworkTPIsRelatedToExtremity, ROLE: abstractionSNTP> <layerNetworkDomainIsMadeOf, ROLE: containerLND> <accessGroupIsMadeOfNetworkTTPs, ROLE: containerAG>

Nombre de interfaz	Objeto de información	Atributos y relaciones
topmanSubnetworkQueryIfce	<topmanSubnetwork>	<resourceId> <signalIdentification> <userLabel> <linkBinds, ROLE: transferCapacityLink> <subnetworkIsDelimitedBy, ROLE: elementSNTP> <linkEndIsBoundTo, ROLE: transferCapacityLE> <subnetworkHasSubnetworkConnections, ROLE: elementSNC> <linkConnectionIsTerminatedByTopological Entities, ROLE: transportEntityLC> <layerNetworkDomainIsMadeOf, ROLE: containerLND>
topmanSubnetworkTPQueryIfce	<topmanSubnetworkTP>	<resourceId> <signalIdentification> <pointDirectionality> <subnetworkIsDelimitedBy, ROLE: containerSN> <subnetworkTPIsRelatedToExtremity, ROLE: extremity> <layerNetworkDomainIsMadeOf, ROLE: containerLND>
topmanTopologicalLinkEndQueryIfce	<topmanTopologicalLinkEnd>	<resourceId> <signalIdentification> <topologicalEndDirection> <userLabel> <layerNetworkDomainIsMadeOf, ROLE: containerLND> <linkEndIsBoundTo, ROLE: topologicalEntity> <topologicalLinkEndIsSupportedByNetwork TTP, ROLE: serverTTP>
topmanTopologicalLinkQueryIfce	<topmanTopologicalLink>	<resourceId> <signalIdentification> <linkDirectionality> <userLabel> <linkBinds, ROLE: a_endTopological, ROLE: z_endTopological> <layerNetworkDomainIsMadeOf, ROLE: containerLND> <topologicalLinkIsSupportedByTrail, ROLE: serverTrail>

## 7.2 Interfaces operacionales

### 7.2.1 Interfaz común de recursos

La interfaz común de recursos proporciona funcionalidad para cambiar el identificador (de recurso) de los recursos mediante la operación "cambio de identificador de recurso". Satisface los requisitos de empresa indicados en <"Rec. G.852.2", COMMUNITY: Transport Network Enterprise Model, General policy>.

```
COMPUTATIONAL_INTERFACE commonResourceIfce {
```

```
    OPERATION      <changeResourceIdentifier>; }
```

#### 7.2.1.1 Cambiar identificador de recurso (change resource identifier)

<"Rec. G.852.2", COMMUNITY: Transport Network Enterprise Model, General policy>

```
OPERATION changeResourceId {
```

```
    INPUT_PARAMETERS
```

```
        layerND: LayerNetworkDomainId ::= TopmanLayerNetworkDomainQueryIfce;  
        involvedResource: ResourceChoice  
        newResourceIdentifier: UserIdentifier ::= SimpleNameType;
```

```
    OUTPUT_PARAMETERS
```

```
        agreedResourceIdentifier: UserIdentifier ::= SimpleNameType;
```

```
    RAISED_EXCEPTIONS
```

```
        invalidResource: NULL;  
        newResourceIdentifierNotUnique: newResourceIdentifier;  
        failureToChangeId: NULL;
```

BEHAVIOUR

SEMI\_FORMAL

```
PARAMETER_MATCHING
```

```
    layerND: <INFORMATION OBJECT: topmanLayerNetworkDomain>;  
    involvedResource: <INFORMATION OBJECT networkInformationTop>;  
    newResourceIdentifier: <INFORMATION ATTRIBUTE: resourceId>;  
    agreedResourceIdentifier: <INFORMATION ATTRIBUTE: resourceId>;
```

```
PRE_CONDITIONS
```

```

}

```

## 7.2.2 Interfaz de provisión de recursos de topología

La interfaz de provisión de recursos de topología proporciona la funcionalidad para la provisión de los recursos definidos en <"Rec. G.852.2", COMMUNITY: Transport Network Enterprise Model>.

```

COMPUTATIONAL_INTERFACE topologyResourcesProvisioningIfce {
    OPERATION      <createAccessGroup>;
                  <deleteAccessGroup>;
                  <createLink>;
                  <deleteLink>;
                  <createLinkEnd>;
                  <deleteLinkEnd>;
                  <createSubnetwork>;
                  <deleteSubnetwork>;
                  <createTopologicalLink>;
                  <deleteTopologicalLink>;
                  <createTopologicalLinkEnd>;
                  <deleteTopologicalLinkEnd>; }

```

### 7.2.2.1 Crear grupo de acceso (create access group)

<COMMUNITY: Topology Management, ACTION: create access group>

```

OPERATION createAccessGroup {
    INPUT_PARAMETERS
        layerND: LayerNetworkDomainId;
        suppliedUserIdentity: Identifier;
            -- zero length string or 0 implies none supplied.
        suppliedUserLabel: GraphicString;
            -- zero length string implies none supplied.
        suppliedDirection: topologicalEndDirection;

    OUTPUT_PARAMETERS
        accessGroup: AccessGroupId;

    RAISED_EXCEPTIONS
        suppliedUserIdentityNotUnique: suppliedUserIdentity;
        failureToSetUserIdentity: NULL;

## 7.4 Producciones de soporte ASN.1

En esta especificación, cuando se utiliza un nombre de interfaz dentro de una producción ASN.1, se utilizará la misma etiqueta, con la letra inicial mayúscula. La definición de tipo ASN.1 completa para esta interfaz de indagación (por ejemplo, uso de ObjectIdentifier, INTEGER, ....) se desarrollará como parte del punto de vista de la ingeniería, con la tecnología pertinente.

```
AccessGroupId ::= CHOICE {
    accessGroupQueryIfce
    userIdentifier
}
LayerNetworkDomainId ::= CHOICE {
    layerNetworkDomainQueryIfce
    userIdentifier
}
LinkEndChoice ::= CHOICE {
    subnetwork
    accessGroup
}
LinkEndId ::= CHOICE {
    linkEndQueryIfce
    userIdentifier
}
LinkId ::= CHOICE {
    linkQueryIfce
    userIdentifier
}
ResourceChoice ::= CHOICE {
    resourceId
    userIdentifier
}
