Recommandation UIT-T M.3101

(Antérieurement «Recommandation du CCITT»)

AVANT-PROPOS

L'UIT-T (Secteur de la normalisation des télécommunications) est un organe permanent de l'Union internationale des télécommunications (UIT). Il est chargé de l'étude des questions techniques, d'exploitation et de tarification, et émet à ce sujet des Recommandations en vue de la normalisation des télécommunications à l'échelle mondiale.

La Conférence mondiale de normalisation des télécommunications (CMNT), qui se réunit tous les quatre ans, détermine les thèmes d'études à traiter par les Commissions d'études de l'UIT-T lesquelles élaborent en retour des Recommandations sur ces thèmes.

L'approbation des Recommandations par les Membres de l'UIT-T s'effectue selon la procédure définie dans la Résolution n° 1 de la CMNT (Helsinki, 1^{er}-12 mars 1993).

La Recommandation UIT-T M.3101, que l'on doit à la Commission d'études 4 (1993-1996) de l'UIT-T, a été approuvée le 27 juillet 1995 selon la procédure définie dans la Résolution n° 1 de la CMNT.

NOTE

Dans la présente Recommandation, l'expression «Administration» est utilisée pour désigner de façon abrégée aussi bien une administration de télécommunications qu'une exploitation reconnue de télécommunications.

DÉCLARATIONS DE CONFORMITÉ D'OBJETS GÉRÉS POUR LE MODÈLE GÉNÉRIQUE D'INFORMATION DE RÉSEAU

(Genève, 1995)

1 Champ d'application

La présente Recommandation définit les prescriptions de conformité de gestion du modèle générique d'information de réseau (GNIM) décrit dans la Recommandation M.3100. Elle ne définit pas de prescriptions de conformité pour les informations de gestion qui ne sont traitées que dans la Recommandation M.3100.

2 Références

Les Recommandations et autres références suivantes contiennent des dispositions qui, par suite de la référence qui y est faite, constituent des dispositions valables pour la présente Recommandation. Au moment de la publication, les éditions indiquées étaient en vigueur. Toute Recommandation ou autre référence est sujette à révision; tous les utilisateurs de la présente Recommandation sont donc invités à rechercher la possibilité d'appliquer les éditions les plus récentes des Recommandations et autres références indiquées ci-après. Une liste des Recommandations UIT-T en vigueur est publiée régulièrement.

- Recommandation UIT-T M.3100 (1995), *Modèle générique d'information de réseau*.
- Recommandation UIT-T Q.821 (1993), *Description des étapes 2 et 3 pour l'interface Q3 – Supervision des alarmes*.
- Recommandation UIT-T X.291 (1995), *Spécification des suites de tests abstraites*.
- Recommandation UIT-T X.296 (1996), *Déclaration de conformité de l'application*.
- Recommandation UIT-T X.721 (1992), *Technologie de l'information – Interconnexion des systèmes ouverts – Structure des informations de gestion – Définition des informations de gestion*.
- Recommandation UIT-T X.724 (1993), *Technologie de l'information. Interconnexion des systèmes ouverts. Gestion des systèmes: Spécifications et directives pour l'établissement des formulaires de déclaration de conformité des instances de protocole associées aux informations de gestion*.

3 Abréviations

Pour les besoins de la présente Recommandation, les abréviations suivantes sont utilisées:

GNIM	Modèle générique d'information de réseau (<i>generic network information model</i>)
MCS	Résumé de conformité de gestion (<i>management conformance summary</i>)
MOCS	Déclaration de conformité d'objet géré (<i>managed object conformance statement</i>)
MRCS	Déclaration de conformité de la relation gérée (<i>managed relationship conformance statement</i>)

4 Prescriptions de conformité des informations de gestion

Pour être conforme aux dispositions de la présente Recommandation, le texte d'un formulaire de résumé de conformité de gestion (MCS) doit être identique à celui du formulaire MCS reproduit dans l'Annexe A, sauf en ce qui concerne la pagination et les en-têtes de page.

Pour être conforme aux dispositions de la présente Recommandation, le texte d'un formulaire de déclaration de conformité d'objet géré (MOCS) applicable aux classes d'objets gérés définies dans la Recommandation M.3100 doit être identique à celui du formulaire MOCS reproduit dans l'Annexe B, sauf en ce qui concerne la pagination et les en-têtes de page.

Pour être conforme aux dispositions de la présente Recommandation, le texte d'un formulaire de déclaration de conformité de la relation gérée (MRCS) applicable aux rattachements de noms définis dans la Recommandation M.3100 doit être identique à celui du formulaire MRCS reproduit dans l'Annexe C, sauf en ce qui concerne la pagination et les en-têtes de page.

Le fournisseur d'un système conforme aux dispositions de la présente Recommandation et de la Recommandation M.3100 doit:

- fournir les informations nécessaires pour identifier de façon univoque le fournisseur et l'application;
- remplir le formulaire du récapitulatif de conformité de gestion figurant dans l'Annexe A;
- remplir les formulaires de déclaration de conformité de l'objet géré figurant dans l'Annexe B;
- remplir les formulaires de déclaration de conformité de la relation gérée figurant dans l'Annexe C.

5 Structure

Le formulaire du récapitulatif de conformité de gestion est reproduit dans l'Annexe A. Le récapitulatif ne porte pas sur les rattachements de noms et les classes d'objets gérés jugés obsolètes et figurant dans l'Appendice II/M.3100.

L'Annexe B définit les formulaires MOCS applicables aux classes d'objets gérés définies dans le corps du texte de la Recommandation M.3100, c'est-à-dire à l'exclusion des classes d'objets gérés jugées obsolètes et définies dans l'Appendice II/M.3100.

L'Annexe C définit les formulaires MRCS applicables aux rattachements de noms définis dans la Recommandation M.3100.

L'Appendice I définit les formulaires MOCS applicables aux rattachements de noms et aux classes d'objets gérés jugés obsolètes et définis dans l'Appendice II/M.3100.

L'Appendice II définit les formulaires MRCS applicables aux rattachements de noms obsolètes mentionnés dans l'Appendice II/M.3100.

6 Lignes directrices supplémentaires

6.1 Utilisation de la syntaxe ASN.1 NameType

La syntaxe de définition de type de nom NameType, qui est utilisée à des fins de dénomination, est définie sous la forme d'une structure de choix d'un entier ou d'une chaîne. L'application peut utiliser l'une ou l'autre de ces possibilités, ou les deux, pour différentes instances d'objets. L'utilisation de ces syntaxes influe sur le comportement des opérations avec filtrage.

Pour chaque attribut faisant appel à la syntaxe NameType, le fournisseur d'un système conforme aux dispositions de la présente Recommandation et de la Recommandation M.3100 doit indiquer le résultat escompté dans la colonne «informations supplémentaires».

Annexe A

Formulaire du résumé de conformité de gestion (MCS)¹⁾ (Cette annexe fait partie intégrante de la présente Recommandation)

A.1 Introduction

A.1.1 Purpose and structure

The Management Conformance Summary (MCS) is a statement by a supplier that identifies an implementation and provides information on whether the implementation claims conformance to any of the listed set of standards that specify conformance requirements to OSI management.

¹⁾ Les utilisateurs de la présente Recommandation sont autorisés à reproduire le formulaire MCS de la présente annexe pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire une fois celui-ci complété.

The MCS proforma is a document, in the form of a questionnaire, designed by a proforma specifier, that when completed by the supplier of an implementation becomes the MCS.

A.1.2 Instructions for completing the MCS proforma to produce the MCS²⁾

The supplier of the implementation shall enter an explicit statement in each of the boxes provided. Specific instruction is provided in the text which precedes each table.

A.1.3 Symbols and abbreviations

The following abbreviations are used throughout the proformas of Annexes A, B and C.

m3100InformationModel	{ ccitt(0) recommendation(0) m(13) gnm(3100) informationModel(0) }
m3100ObjectClass	{ m3100InformationModel managedObjectClass(3) }
m3100NameBinding	{ m3100InformationModel nameBinding(6) }
m3100Attribute	{ m3100InformationModel attribute(7) }
m3100Action	{ m3100InformationModel action(9) }
q821InformationModel	{ ccitt(0) recommendation(0) q(17) q821(821) informationModel(0) }
q821Parameter	{ q821InformationModel parameter(9) }
smi2MobjectClass	{ joint-iso-ccitt(2) ms(9) smi(3) part2(2) managedObjectClass(3) }
smi2NameBinding	{ joint-iso-ccitt(2) ms(9) smi(3) part2(2) nameBinding(6) }
smi2AttributeID	{ joint-iso-ccitt(2) ms(9) smi(3) part2(2) attribute(7) }
smi2Notification	{ joint-iso-ccitt(2) ms(9) smi(3) part2(2) notification(10) }

A.2 Identification of the implementation

A.2.1 Date of statement

The supplier of the implementation shall enter the date of this statement in the box below. Use the format DD-MM-YYYY.

Date of statement

A.2.2 Identification of the implementation

The supplier of the implementation shall enter information necessary to uniquely identify the implementation and the system(s) in which it may reside, in the box below.

²⁾ On trouvera à l'article 5 de la Rec. X.724 | ISO/CEI 10165-6, des instructions concernant la façon dont il faut remplir le formulaire MCS.

A.2.3 Identification of the implementation

The supplier of the implementation shall enter information necessary to uniquely identify the implementation and the system(s) in which it may reside, in the box below.

A.2.4 Contact

The supplier of the implementation shall provide information on whom to contact if there are any queries concerning the content of the MCS, in the box below.

A.3 Identification of the Recommendation in which the management information is defined

The supplier of the implementation shall enter the title, reference number and date of the publication of the Recommendation | International Standard which specifies the management information to which conformance is claimed, in the box below.

Recommendation to which conformance is claimed

A.3.1 Technical corrigenda implemented

The supplier of the implementation shall enter the reference numbers of implemented technical corrigenda which modify the Recommendation to the identified Recommendation, in the box below.

A.4 Management conformance summary

The supplier of the implementation shall provide information on whether the implementation claims conformance to any of the set of standards globally representing the implementation under claim. For each standard the supplier of the implementation claims conformance to, the corresponding conformance statement(s) shall be filled in, or referenced by, the MCS. Columns 7 (Support), 8 (Table numbers of PICS/MOCS/MRCS) and 9 (Additional information) are to be filled in by the supplier of the implementation.

The following common notations, defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7 are used for the status value column:

- m mandatory;
- o optional;
- c conditional;
- x prohibited;
- not applicable or out of scope.

Note that “c”, “m”, “o” and “x” are prefixed by a “c:” when nested under a conditional or optional item of the same table.

Note that “o” may be suffixed by “.n” (where “n” is a unique number) for mutually exclusive or selectable options among a set of status values.

The following common notations, defined in Rec. X.724 | ISO/IEC 10165-6 and Rec. X.296 | ISO/IEC 9646-7 are used for the support answer column:

- Y implemented;
- N not implemented;
- no answer required;
- Ig the item is ignored (i.e. processed syntactically but not semantically).

See Tables A.1 to A.3.

Annexe B**Formulaire de déclaration de conformité d'objet géré (MOCS)³⁾**
(La présente annexe fait partie intégrante de la Recommandation)**B.1 Introduction**

The purpose of this MOCS proforma is to provide a mechanism for a supplier of an implementation which claims conformance to a managed object class to provide conformance information in a standard form.

B.2 Instructions for completing the MOCS proforma to produce a MOCS⁴⁾

The supplier of the implementation shall state which items are supported in the tables and if necessary provide additional information.

The following common notations, defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7 are used for the status value columns:

- m mandatory;
- o optional;
- c conditional;
- x prohibited;
- not applicable or out of scope.

Note that “c”, “m”, “o” and “x” are prefixed by a “c:” when nested under a conditional or optional item of the same table.

Note that “o” may be suffixed by “.n” (where “n” is a unique number) for mutually exclusive or selectable options among a set of status values.

In the status column, the static requirements are stated as follows:

- m for characteristics contained in mandatory packages or in conditional packages if the GDMO condition is always true;
- o for characteristics of conditional packages with GDMO conditions that indicate static optionality, e.g. “if an instance supports it”;
- cn for all other conditions, where “n” is a unique integer and “cn” is a reference to a conditional status expression as defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7. Each condition denoted by “cn” is relative to the containing table;
- x for characteristics explicitly prohibited by the definition;
- for characteristics that are not mentioned by the definition.

³⁾ Les utilisateurs de la présente Recommandation sont autorisés à reproduire le formulaire MOCS de la présente annexe pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire une fois celui-ci complété.

⁴⁾ On trouvera à l'article 5 de la Rec. X.724 | ISO/CEI 10165-6, des instructions concernant la façon dont il faut remplir le formulaire MOCS.

The following common notations, defined in Rec. X.724 | ISO/IEC 10165-6 and Rec. X.296 | ISO/IEC 9646-7 are used for the support answer columns:

- Y implemented;
- N not implemented;
- no answer required.

B.3 Statement of conformance to the alarmSeverityAssignmentProfile object class

See Table B.1.

TABLE B.1/M.3101
Managed object class support

Index	Managed object class template label	Value of object identifier for class	Support of all mandatory features	Is the actual class the same as the managed object class to which conformance is claimed? (Y/N)
1	alarmSeverityAssignmentProfile	{m3100ObjectClass 22}		

If the answer to the actual class question in the managed object class support table is no, the supplier of the implementation shall fill in the actual class support in Table B.2.

TABLE B.2/M.3101
Actual class support

Index	Actual managed object class template label	Value of object identifier for actual class	Additional information
2.1			
2.2			

B.3.1 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table B.3. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

TABLE B.3/M.3101
Attribute support

Index	Attribute template label	Value of object identifier for attribute	Constraints and values	Set by create		Get		Replace

3.2	x		x		x		
3.3	x		x		x		
3.4	x		x		x		
3.5	x		x		x		
3.6	x		x		x		

c1 : IF “if an object supports allomorphism” THEN m ELSE –
 c2 : IF “any registered package, other than this package has been instantiated” THEN m ELSE –

B.3.2 Attribute groups

There are no attribute groups defined for the managed object class.

B.3.3 Actions

There are no actions defined for this object class.

B.3.4 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table B.4. The supplier of the implementation shall indicate support in terms of the confirmed and non-confirmed modes.

TABLE B.4/M.3101

Notification support

Index	Notification type template label	Value of object identifier for notification type	Constraints and values	Status	Support		Additional information

B.15.5 Parameters

There are no parameters defined for this object class.

B.16 Statement of conformance to the gtp object class

See Table B.59.

TABLE B.59/M.3101
Managed object class support

Index	Managed object class template label	Value of object identifier for class	Support of all mandatory features	Is the actual class the same as the managed object class to which conformance is claimed? (Y/N)
1	gtp	{m3100ObjectClass 17}		

If the answer to the actual class question in the managed object class support table is no, the supplier of the implementation shall fill in the actual class support in Table B.60.

TABLE B.60/M.3101
Actual class support

Index	Actual managed object class template label	Value of object identifier for actual class	Additional information
2.1			
2.2			

B.16.1 Attributes

The supplier of the implementation shall state whether or not the attributes specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table B.61. The supplier of the implementation shall indicate support for each of the operations for each attribute supported.

TABLE B.61/M.3101
Attribute support

Index	Attribute template label	Value of object identifier for attribute	Constraints and values	Set by create		Get		Replace	
				Status	Support	Status	Support	Status	Support

B.24.2 Attribute groups

There are no attribute groups defined for the managed object class.

B.24.3 Actions

There are no actions defined for this object class.

B.24.4 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table B.92. The supplier of the implementation shall indicate support in terms of the confirmed and non-confirmed modes.

TABLE B.92/M.3101

Notification support

Index	Notification type template label	Value of object identifier for notification type	Constraints and values	Status	Support		Additional information
					Con-	Non-

B.31.5 Parameters

There are no parameters defined for this object class.

Annexe C

Formulaire MRCS⁵⁾

(Cette annexe fait partie intégrante de la présente Recommandation)

C.1 Introduction

The purpose of this MRCS proforma is to provide a mechanism for a supplier of an implementation which claims conformance to a managed object class to provide conformance information in a standard form.

C.2 Instructions for completing the MRCS proforma to produce a MRCS⁶⁾

The supplier of the implementation shall state which items are supported in the tables and if necessary provide additional information.

The following common notations, defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7 are used for the status value columns:

- m mandatory;
- o optional;
- c conditional;
- x prohibited;
- not applicable or out of scope.

Note that “c”, “m”, “o” and “x” are prefixed by a “c:” when nested under a conditional or optional item of the same table.

Note that “o” may be suffixed by “.n” (where “n” is a unique number) for mutually exclusive or selectable options among a set of status values.

In the status column, the static requirements are stated as follows:

- m for characteristics contained in mandatory packages or in conditional packages if the GDMO condition is always true;
- o for characteristics of conditional packages with GDMO conditions that indicate static optionality, e.g. “if an instance supports it”;
- cn for all other conditions, where “n” is a unique integer and “cn” is a reference to a conditional status expression as defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7. Each condition denoted by “cn” is relative to the containing table;
- x for characteristics explicitly prohibited by the definition;
- for characteristics that are not mentioned by the definition.

The following common notations, defined in Rec. X.724 | ISO/IEC 10165-6 and Rec. X.296 | ISO/IEC 9646-7 are used for the support answer columns:

- Y implemented;
- N not implemented;
- no answer required;
- Ig the item is ignored (i.e. processed syntactically, but not semantically).

⁵⁾ Les utilisateurs de la présente Recommandation sont autorisés à reproduire le formulaire MRCS de la présente annexe pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire une fois celui-ci complété.

⁶⁾ On trouvera à l'article 5 de la Rec. X.724 | ISO/CEI 10165-6, des instructions concernant la façon dont il faut remplir le formulaire MRCS.

C.3 Name binding support

The second part may only contain status values other than “x”, i.e. not applicable, for name bindings that may be used for creation or deletion of managed object through management operations. Hence, the second part of Table C.1 only show name bindings for which at least one of the status values are different from “x”. See also Table C.2.

Appendice I**Formulaire de déclaration de conformité de l'objet géré (MOCS)⁷⁾**
(Cet appendice ne fait pas partie intégrante de la présente Recommandation)**I.1 Introduction**

The purpose of this MOCS proforma is to provide a mechanism for a supplier of an implementation which claims conformance to a managed object class to provide conformance information in a standard form.

I.2 Instructions for completing the MOCS proforma to produce a MOCS⁸⁾

The supplier of the implementation shall state which items are supported in the tables and if necessary provide additional information.

The following common notations, defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7 are used for the status value columns:

- m mandatory;
- o optional;
- c conditional;
- x prohibited;
- not applicable or out of scope.

Note that “c”, “m”, “o” and “x” are prefixed by a “c:” when nested under a conditional or optional item of the same table.

Note that “o” may be suffixed by “.n” (where “n” is a unique number) for mutually exclusive or selectable options among a set of status values.

In the status column, the static requirements are stated as follows:

- m for characteristics contained in mandatory packages or in conditional packages if the GDMO condition is always true;
- o for characteristics of conditional packages with GDMO conditions that indicate static optionality, e.g. “if an instance supports it”;

⁷⁾ Les utilisateurs de la présente Recommandation sont autorisés à reproduire le formulaire MOCS du présent appendice pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire une fois celui-ci complété.

⁸⁾ On trouvera à l'article 5 de la Rec. X.724 | ISO/CEI 10165-6, des instructions concernant la façon dont il faut remplir le formulaire MOCS.

- cn for all other conditions, where “n” is a unique integer and “cn” is a reference to a conditional status expression as defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7. Each condition denoted by “cn” is relative to the containing table;
- x for characteristics explicitly prohibited by the definition;
- for characteristics that are not mentioned by the definition.

The following common notations, defined in Rec. X.724 | ISO/IEC 10165-6 and Rec. X.296 | ISO/IEC 9646-7 are used for the support answer columns:

- Y implemented;
- N not implemented;
- no answer required;
- Ig the item is ignored (i.e. processed syntactically, but not semantically).

I.3 Statement of conformance to the connection object class

See Table I.1.

TABLE I.1/M.3101

I.4.2 Attribute groups

There are no attribute groups defined for the managed object class.

I.4.3 Actions

There are no actions defined for this object class.

I.4.4 Notifications

The supplier of the implementation shall state whether or not the notifications specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table I.9. The supplier of the implementation shall indicate support in terms of the confirmed and non-confirmed modes.

TABLE I.9/M.3101

Notification support

Index	Notification type template label	Value of object identifier for notification type	Constraints and values	Status	Support		Additional information
					Con-	Non-	
4.1	attributeValueChange	{smi2Notification 1}		o			
4.2	communicationsAlarm	{smi2Notification 2}		o			
4.3	objectCreation	{smi2Notification 6}		o			
4.4	objectDeletion	{smi2Notification 7}		o			
4.5	stateChange	{smi2Notification 14}		o			

TABLE I.9/M.3101

Notification support (end)

I.4.5 Parameters

The supplier of the implementation shall state whether or not the parameters specified by all packages instantiated in a managed object of this class are supported, in the “Support” and “Additional information” columns in Table I.10.

TABLE I.10/M.3101

Parameter support

Index	Parameter template label	Value of object identifier for parameter	Constraints and values	Status	Support	Additional information
5.1	correlatedRecordNameParameter	{q821Parameter 2}		o		
5.2	logRecordIdParameter	{q821Parameter 1}		o		
5.3	suspectObjectListParameter	{q821Parameter 3}		o		

Appendice II

Formulaire de déclaration de conformité de la relation gérée (MRCS)⁹⁾

(Cet appendice ne fait pas partie intégrante de la présente Recommandation)

II.1 Introduction

The purpose of this MRCS proforma is to provide a mechanism for a supplier of an implementation which claims conformance to a managed object class to provide conformance information in a standard form.

II.2 Instructions for completing the MRCS proforma to produce a MRCS¹⁰⁾

The supplier of the implementation shall state which items are supported in the tables and if necessary provide additional information.

The following common notations, defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7 are used for the status value columns:

- m mandatory;
- o optional;
- c conditional;
- x prohibited;
- not applicable or out of scope.

Note that “c”, “m”, “o” and “x” are prefixed by a “c:” when nested under a conditional or optional item of the same table.

Note that “o” may be suffixed by “.n” (where “n” is a unique number) for mutually exclusive or selectable options among a set of status values.

In the status column, the static requirements are stated as follows:

- m for characteristics contained in mandatory packages or in conditional packages if the GDMO condition is always true;
- o for characteristics of conditional packages with GDMO conditions that indicate static optionality, e.g. “if an instance supports it”;
- cn for all other conditions, where “n” is a unique integer and “cn” is a reference to a conditional status expression as defined in Rec. X.291 | ISO/IEC 9646-2 and Rec. X.296 | ISO/IEC 9646-7. Each condition denoted by “cn” is relative to the containing table;
- x for characteristics explicitly prohibited by the definition;
- for characteristics that are not mentioned by the definition.

The following common notations, defined in Rec. X.724 | ISO/IEC 10165-6 and Rec. X.296 | ISO/IEC 9646-7 are used for the support answer columns:

- Y implemented;
- N not implemented;
- no answer required;
- Ig the item is ignored (i.e. processed syntactically, but not semantically).

⁹⁾ Les utilisateurs de la présente Recommandation sont autorisés à reproduire le formulaire MRCS du présent appendice pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire une fois celui-ci complété.

¹⁰⁾ On trouvera à l'article 5 de la Rec. X.724 | ISO/CEI 10165-6, des instructions concernant la façon dont il faut remplir le formulaire MRCS.

II.3 Name binding support

The second part may only contain status values other than “x”, i.e. not applicable, for name bindings that may be used for creation or deletion of managed object through management operations. Hence, the second part of Table II.1 only shows name bindings for which at least one of the status values is different from “x”.

TABLE II.1/M.3101

Name binding support

Index	Attribute binding template label	Value of object identifier for name binding	Constraints and values	Status	Support	Additional information
1	connection-network	{m3100NameBinding 2}		o		
2	trail-network	{m3100NameBinding 22}		o		

TABLE II.1/M.3101

Name binding support (*end*)

Index	Sub-index	Operation	Constraints and values	Status	Support	Additional information
1	1.1	Create support		c:m		
	1.1.1	Create with reference object		c:x		
	1.1.2	Create with automatic instance naming		c:x		
	1.2	Delete support		c:m
