## **FOREWORD**

The ITU-T (Telecommunication Standardization Sector) is a permanent organ of the International Telecommunication Union (ITU). The ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Conference (WTSC), which meets every four years, establishes the topics for study by the ITU-T Study Groups which, in their turn, produce Recommendations on these topics.

The approval of Recommendations by the Members of the ITU-T is covered by the procedure laid down in WTSC Resolution No. 1 (Helsinki, March 1-12, 1993).

Supplement to ITU Recommendation V.25 *ter* was prepared by ITU-T Study Group 14 (1993-1996) and was approved under the WTSC Resolution No. 1 procedure on the 19th of April 1995.

---

### **NOTE**

In this Supplement, the expression “Administration” is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

## **SERIAL ASYNCHRONOUS AUTOMATIC DIALLING AND CONTROL**

*(Geneva, 1995)*

### **1 Introduction and scope**

Recommendation V.25 *ter* codifies the most common commands used by DTE to control DCE on asynchronous DTE-DCE connections. Recommendation V.25 *ter* also codifies the syntax to be used by standards committees for extending this command in various ways.

There are now many standards based on this command set using the extended syntax, and more are in development. The committees active in this area include:

Responsible Committee	Reserved Lead-in(s)	Scope
ITU-T Q.7/14	+A, +D, +E, +G, +I, +M, +S	DTE-DCE Protocols/Data Transmission
ITU-T Q.5/8	+F	ITU-T Group 3 Facsimile/Telematic Services

TIA TR-45.5	+C	TIA IS-95 Spread Spectrum Digital Cellular
ETSI/SMG/SMG 4	+C	Global System Mobile, Digital Cellular
PCCA MSC	+W	Wireless Communications Services

This supplement is a reference document that collects and summarizes information from this work. This supplement has two purposes:

- Facilitate cooperation between standards bodies.
- Inform developers of communications equipment or software.

This supplement contains two sections:

- References.
- Tables of commands from various sources, sorted by function.
