Recommandation X.712

---

## **Avant-propos**

L'UIT (Union internationale des télécommunications) est une institution spécialisée des Nations Unies dans le domaine des télécommunications. Le CCITT (Comité consultatif international télégraphique et téléphonique) est un organe permanent de l'UIT. Au sein du CCITT, qui est l'entité qui établit les normes mondiales (Recommandations) sur les télécommunications, participent quelque 166 pays membres, 68 exploitations privées reconnues, 163 organisations scientifiques et industrielles et 39 organisations internationales.

L'approbation des Recommandations par les membres du CCITT s'effectue selon la procédure définie dans la Résolution n° 2 du CCITT (Melbourne, 1988). De plus, l'Assemblée plénière du CCITT, qui se réunit tous les quatre ans, approuve les Recommandations qui lui sont soumises et établit le programme d'études pour la période suivante.

Dans certains secteurs de la technologie de l'information qui correspondent à la sphère de compétence du CCITT, les normes nécessaires se préparent en collaboration avec l'ISO et la CEI. Le texte de la Recommandation X.712 du CCITT a été approuvé le 10 septembre 1992. Son texte est publié, sous forme identique, comme Norme internationale ISO/CEI 9596-2.

---

### **NOTE DU CCITT**

Dans cette Recommandation, l'expression «Administration» est utilisée pour désigner de façon abrégée aussi bien une administration de télécommunications qu'une exploitation privée reconnue.

## NOTE D'INFORMATION

Le tableau suivant indique une liste de Recommandations de la Série X.700 élaborées en collaboration avec l'ISO/CEI et qui sont identiques à la Norme internationale correspondante. Ce tableau mentionne les références aux numéros des Normes internationales ISO/CEI ainsi que le titre abrégé de la Recommandation | Norme internationale.

Recommandation du CCITT Norme internationale ISO/CEI	Titre abrégé
X.700   7498-4 (remarque)	Cadre de gestion
X.701   10040	Aperçu général de la gestion des systèmes
X.710   9595 (remarque)	Définition du service commun de transfert d'informations de gestion
X.711   9596-1 (remarque)	Spécification du protocole commun de transfert d'informations de gestion
X.712   9596-2	CMIP PICS
X.720   10165-1	Modèle d'information de gestion
X.721   10165-2	Définition des informations de gestion
X.722   10165-4	Directives pour la définition des objets gérés
X.730   10164-1	Fonction de gestion des objets
X.731   10164-2	Fonction de gestion d'états
X.732   10164-3	Attributs pour représenter les relations
X.733   10164-4	Fonction de signalisation des alarmes
X.734   10164-5	Fonction de gestion des rapports d'événements
X.735   10164-6	Fonction de commande des registres de consignation
X.736   10164-7	Fonction de signalisation des alarmes de sécurité
X.740   10164-8	Fonction de piste de vérification de sécurité
REMARQUE – Cette Recommandation et la Norme internationale ne sont pas identiques, par contre elles sont alignées au point de vue technique.	

**NORME INTERNATIONALE****RECOMMANDATION DU CCITT**

**TECHNOLOGIES DE L'INFORMATION – INTERCONNEXION  
DE SYSTÈMES OUVERTS – PROTOCOLE COMMUN  
DE TRANSFERT D'INFORMATIONS DE GESTION:  
MODÈLE DE DÉCLARATION DE CONFORMITÉ  
D'UNE INSTANCE DE PROTOCOLE**

**1 Domaine d'application**

La présente Recommandation | Norme internationale fournit un modèle de déclaration de conformité d'une instance de protocole (PICS) (*protocol implementation conformance statement*) pour exprimer en détail les spécifications de conformité de la Rec. X.711 du CCITT | ISO/CEI 9596-1. Ce modèle est conforme aux spécifications et directives pertinentes données dans la Rec. X.291 du CCITT | ISO/CEI 9646-2.

L'annexe A contient le modèle de déclaration PICS pour la version 2 du protocole CMIP. L'annexe B contient la version 1 des tableaux de l'unité fonctionnelle noyau qui ont été modifiés dans la version 2. Tous les autres tableaux de l'unité fonctionnelle noyau sont identiques dans les deux versions 1 et 2 du protocole CMIP.

**2 Références normatives**

Les Recommandations du CCITT et Normes internationales suivantes contiennent des dispositions qui, par suite de la référence qui y est faite, constituent des dispositions valables pour la présente Recommandation | Norme internationale. Au moment de la publication, les éditions indiquées étaient en vigueur. Toute Recommandation et Norme sont sujettes à révision et les parties prenantes aux accords fondés sur la présente Recommandation | Norme internationale sont invitées à rechercher la possibilité d'appliquer les éditions les plus récentes des Recommandations et Normes indiquées ci-après. Les membres de la CEI et de l'ISO possèdent le registre des Normes internationales en vigueur. Le Secrétariat du CCITT tient à jour une liste des Recommandations du CCITT actuellement en vigueur.

**2.1 Paires de Recommandations du CCITT | Normes internationales équivalentes par leur contenu technique**

- Recommandation X.219 du CCITT (1988), *Opérations distantes: modèle, notation et définition du service.*  
ISO/CEI 9072-1:1989, *Systèmes de traitement de l'information – Communication de texte – Opérations à distance – Partie 1: Modèle, notation et définition du service.*
- Recommandation X.215 du CCITT (1988), *Définition du service de session pour l'interconnexion de systèmes ouverts pour les applications du CCITT.*  
ISO 8326:1987, *Systèmes de traitement de l'information – Interconnexion de systèmes ouverts – Service de session en mode connexion.*
- Recommandation X.216 du CCITT (1988), *Définition du service de présentation de l'OSI (interconnexion des systèmes ouverts) pour les applications du CCITT.*  
ISO 8822:1988, *Systèmes de traitement de l'information – Interconnexion de systèmes ouverts – Définition du service de présentation en mode connexion.*
- Recommandation X.227 du CCITT (1988), *Spécification du service de contrôle d'association de l'OSI (interconnexion des systèmes ouverts) pour les applications du CCITT.*  
ISO 8650:1988, *Systèmes de traitement de l'information – Interconnexion de systèmes ouverts – Spécification du protocole pour l'élément de service de contrôle d'association.*

## **ISO/CEI 9596-2 : 1993 (F)**

- Recommandation X.229 du CCITT (1988), *Opérations distantes: spécification du protocole*.  
ISO/CEI 9072-2:1989, *Systèmes de traitement de l'information – Communication de texte – Opérations à distance – Partie 2: Spécification du protocole*.
- Recommandation X.711 du CCITT (1991), *Spécification du protocole commun de transfert d'informations de gestion pour les applications du CCITT*.  
ISO/CEI 9596-1:1991, *Technologies de l'information – Interconnexion de systèmes ouverts – Protocole commun d'information de gestion – Partie 1: Spécification*.
- Recommandation X.290 du CCITT (1992), *Cadre général et méthodologie des tests de conformité OSI pour les Recommandations sur les protocoles pour les applications du CCITT – Concepts généraux*.  
ISO/CEI 9646-1:1991, *Technologies de l'information – Interconnexion de systèmes ouverts – Cadre général et méthodologie des tests de conformité – Partie 1: Concepts généraux*.
- Recommandation X.291 du CCITT (1992), *Cadre général et méthodologie des tests de conformité OSI pour les Recommandations sur les protocoles pour les applications du CCITT – Spécification des suites de tests abstraites*.  
ISO/CEI 9646-2:1991, *Technologies de l'information – Interconnexion de systèmes ouverts – Cadre général et méthodologie des tests de conformité OSI – Partie 2: Spécification des suites de tests abstraites*.

## **2.2 Références additionnelles**

- ISO 8326/AD2:1988, *Systèmes de traitement de l'information – Interconnexion de systèmes ouverts – Service de session en mode connexion: Addendum 2: to incorporate unlimited user data*.

## **3 Définitions**

Les définitions suivantes s'appliquent aux fins de la présente Recommandation | Norme internationale.

La présente Recommandation | Norme internationale utilise les termes suivants définis dans la Rec. X.290 du CCITT | ISO/CEI 9646-1:

- a) modèle de déclaration PICS;
- b) déclaration de conformité d'une instance de protocole (PICS);
- c) déclaration de conformité de système.

## **4 Abréviations**

ACSE	Elément de service de contrôle d'association ( <i>association control service element</i> )
APDU	Unité de données du protocole d'application ( <i>application protocol data unit</i> )
CMIP	Protocole commun d'information de gestion ( <i>common management information protocol</i> )
CMIS	Service commun d'information de gestion ( <i>common management information service</i> )
CMISE	Elément du service commun d'information de gestion ( <i>common management information service element</i> )
PDU	Unité de données de protocole ( <i>protocol data unit</i> )
PICS	Déclaration de conformité d'une instance de protocole ( <i>protocol implementation conformance statement</i> )
ROSE	Elément de service d'opérations distantes ( <i>remote operations service element</i> ).

## 5 Conformité

Un modèle de déclaration PICS conforme à la présente Recommandation | Norme internationale doit être textuellement identique à l'annexe A, exception faite de la pagination et des en-têtes de page uniquement. Une déclaration PICS conforme à la présente Recommandation | Norme internationale doit:

- décrire une instance conforme à la Rec. X.711 du CCITT | ISO/CEI 9596-1;
- être conforme au modèle de déclaration PICS rempli en accord avec les instructions appropriées données dans l'article 1 de l'annexe A;
- contenir les informations nécessaires pour définir de manière unique le fournisseur aussi bien que l'instance.

Le fournisseur d'une instance de protocole déclarée conforme à la Rec. X.711 du CCITT | ISO/CEI 9596-1 doit remplir une copie du modèle de déclaration PICS donné dans l'annexe A en tant que partie des spécifications de conformité, doit remplir une copie du modèle de déclaration PICS fourni dans l'annexe B si l'instance est déclarée satisfaisante à la version 1 du protocole CMIP et doit fournir les informations nécessaires pour identifier à la fois le fournisseur et l'instance.

REMARQUE – La version 1 du protocole CMIP est spécifiée dans ISO/CEI 9596 qui a laissé la place maintenant à l'ISO/CEI 9596-1. Il n'existe pas de publication du CCITT équivalant à l'ISO/CEI 9596.

**Annexe A**  
**Formulaire PICS<sup>1)</sup>**

(Cette annexe fait partie intégrante de la présente Recommandation | Norme internationale)

## A.1 Instructions for completing the PICS proforma

### A.1.1 Purpose and structure

The purpose of this PICS proforma is to provide a mechanism whereby a supplier of an implementation of CCITT Rec. X.711 | ISO/IEC 9596-1 may provide information in a standard form. The PICS proforma is subdivided into clauses for the following categories of information:

- implementation details;
- protocol details;
- overall conformance claim;
- implementation capabilities.

### A.1.2 Symbols, abbreviations and terms

The PICS proforma contained in this annex is comprised of information in a tabular form in accordance with the guidelines presented in CCITT Rec. X.291 | ISO/IEC 9646-2. The following abbreviations are used:

ADB	ANY DEFINED BY
Spt	Support
Sts	Status
TVR	Type(s), value(s) and range(s)

The following common notations, defined in CCITT Rec. X.291 | ISO/IEC 9646-2 are used for the status (Sts) column:

m	mandatory
o	optional
o.N	(N is an integer) support of at least one of the choices is required
x	prohibited
–	not applicable

The following requirements are commonly used throughout the PICS proforma:

- c1 if A.7.1 then m else –
- c2 if A.7.2 then m else –
- c3 if A.7.3 then m else –
- c4 if A.14.5/1 or A.14.5/2 then o else –
- c5 if A.7.5 then m else –
- c6 if A.7.1 or A.7.2 or A.7.3 or A.7.4 or A.7.5 then m else o
- c7 if A.7.1 then m else o
- c8 if A.6.2 then m else o.16
- c9 if A.7.2 and (A.14.1/1 or A.14.3/1 or A.14.5/1 or A.14.6/1) then m else –
- c10 if A.7.2 and (A.14.1/2 or A.14.3/2 or A.14.5/2 or A.14.6/2) then m else –
- c11 if A.1.1/1 then m else –
- c12 if A.1.1/2 then m else –

---

<sup>1)</sup> Les utilisateurs de la présente Recommandation | Norme internationale sont autorisés à reproduire le formulaire PICS de la présente annexe pour utiliser celui-ci conformément à son objet. Ils sont également autorisés à publier le formulaire PICS une fois celui-ci complété.

**NOTES**

- 1 A.1.1 is support for association initialisation.
- 2 A.6.2 is support for all of the kernel functional unit.
- 3 A.7.1 is support for the multiple object selection functional unit.
- 4 A.7.2 is support for the filter functional unit.
- 5 A.7.3 is support for the multiple reply functional unit.
- 6 A.7.4 is support for the extended service functional unit.
- 7 A.7.5 is support for the cancel get functional unit.
- 8 A.14.5 is support for protocol for the M-GET service.

The following common notations, defined in CCITT Rec. X.291 | ISO/IEC 9646-2 are used for the support (Spt) column:

N	not implemented
Y	implemented
-	not applicable

Within this PICS proforma, index numbers have been uniquely generated by prefixing the table identifier as the first component of the index. In the conditional predicates specified above, the identification of the referenced items is constructed from the unique index number with the answer column identifier appended, as defined in CCITT Rec. X.291 | ISO/IEC 9646-2. When only one answer column is present for the index, the column identifier has been omitted.

Within this PICS proforma, ASN.1 values specified in the Syntax column of the tables are provided for guidance purposes only. No attempt has been made to specify any IMPLICIT condition or any tag value associated with any parameter. CCITT Rec. X.711 | ISO/IEC 9596-1 contains the definitive specification of the abstract syntax.

Within this PICS proforma, space has been provided for the supplier of the implementation to specify types, values and ranges of all parameters supported. It is recommended that references to additional specifications are included where appropriate (for example, to list the OBJECT IDENTIFIER values and/or ranges supported), and that these additional specifications be appended to the completed PICS proforma.

The parameter names in the tables within this Recommendation | International Standard correspond with those specified in the abstract syntax of CCITT Rec. X.711 | ISO/IEC 9596-1.

#### A.1.3 Scoping rules

In the Status column of the tables in this Recommendation | International Standard, a mandatory element contained within an optional or conditional constructor parameter is mandatory only if the option or condition is taken.

#### A.1.4 Instructions for completing the PICS

The supplier of the implementation shall enter an explicit statement in each of the boxes provided using the notation described in A.1.2. Specific instruction is provided in the text which precedes each table.

### A.2 Identification of the implementation

#### A.2.1 Date of statement

The supplier of the implementation shall enter the date of this statement in the box below. Use the format DD-MM-YYYY.

Date of statement

**A.2.2 Identification of the implementation**

The supplier of the implementation shall enter information necessary to uniquely identify the implementation and the system(s) in which it may reside, in the box below.

**A.2.3 Contact**

The supplier of the implementation shall provide information on whom to contact if there are any queries concerning the content of the PICS, in the box below.

**A.2.4 Relationship with the system conformance statement**

The supplier of the implementation shall provide information which describes the relationship between the PICS and the system conformance statement for the system, in the box below.

**A.3 Identification of the protocol**

The supplier of the implementation shall enter the title, reference number and date of the publication of the Recommendation | International Standard to which conformance is claimed, in the box below.

Recommendation | International Standard to which conformance is claimed

The supplier of the implementation shall specify support of versions of CMIP, in the box below.

Which version(s) of the CMIP protocol are supported?

The supplier of the implementation shall enter the name of each abstract syntax for CCITT Rec. X.711 | ISO/IEC 9596-1 to which conformance is claimed, and the corresponding transfer syntax name(s) in the box below.

Abstract syntax name	Transfer syntax name(s)

### A.3.1 Defect report numbers and amendments implemented

The supplier of the implementation shall enter the reference numbers of implemented defect reports or corresponding amendment documents which modify the specification to CCITT Rec. X.711 | ISO/IEC 9596-1, in the box below.

--

### A.3.2 Addenda implemented

The supplier of the implementation shall state the titles and reference numbers of implemented addenda to CCITT Rec. X.711 | ISO/IEC 9596-1, in the box below.

--

## A.4 Global statement of conformance

The supplier of the implementation shall state whether or not all mandatory capabilities are implemented for CCITT Rec. X.711 | ISO/IEC 9596-1.

Are all mandatory capabilities implemented?
---

NOTE – Answering NO to this question indicates non-conformance to the protocol standard. Non-supported mandatory capabilities are listed in the PICS below, explaining why the status of the implementation is abnormal.

Capability not implemented	Reason

## A.5 Capabilities

### A.5.1 Initiator/Responder capability

The supplier of the implementation shall state the capability for initiating and responding to an association request which specifies the use of CMISE, in Table A.1.

**Table A.1 – Association initialisation**

Index		Association initiator		Association responder	
		Sts	Spt	Sts	Spt
A.1.1	Does the implementation support association initialisation?	o.1		o.1	

The supplier of the implementation shall state the capability for releasing an association, in Table A.2.

**Table A.2 – Association release**

Index		Release initiator		Release responder	
		Sts	Spt	Sts	Spt
A.2.1	Does the implementation support association release for an association initiated by the implementation?	o.2		o.2	
A.2.2	for an association not initiated by the implementation?	o.3		o.3	

The supplier of the implementation shall state whether or not the CMIPUserInfo and CMIPAbortInfo parameters specified by CCITT Rec. X.711 | ISO/IEC 9596-1 are supported. The supplier shall state the capability for sending and receiving each parameter and the type, value(s) and range(s), in Tables A.3, A.4 and A.5.

**Table A.3 – CMIPUserInfo parameter support (in AARQapdu)**

Index	Parameter name	Sender			Receiver		
		Sts	Spt	TVR	Sts	Spt	TVR
A.3.1	CMIPUserInfo	c11		—	c12		—
A.3.1.1	protocolVersion	m			m		
A.3.1.2	functionalUnits	c6			m		
A.3.1.3	accessControl	o			m		
A.3.1.4	userInfo	o			m		

**Table A.4 – CMIPUserInfo parameter support (in AAREapdu)**

Index	Parameter name	Sender			Receiver		
		Sts	Spt	TVR	Sts	Spt	TVR
A.4.1	CMIPUserInfo	c12		—	c11		—
A.4.1.1	protocolVersion	m			m		
A.4.1.2	functionalUnits	c6			m		
A.4.1.3	accessControl	o			m		
A.4.1.4	userInfo	o			m		

**Table A.5 – CMIPAbortInfo parameter support**

Index	Parameter name	Sender			Receiver		
		Sts	Spt	TVR	Sts	Spt	TVR
A.5.1	CMIPAbortInfo	m		—	m		—
A.5.1.1	abortSource	m			m		
A.5.1.2	userInfo	o			m		

### A.5.2 Major capabilities

The supplier of the implementation shall indicate support for protocol that is required to provide the kernel CMIS services, in Table A.6.

**Table A.6 – Conformance claim**

Index		Sts	Spt
A.6.1	Does the implementation claim to support the protocol that is required to provide some of the kernel CMIS services in the invoker and/or performer roles?	o	
A.6.2	Does the implementation claim to support the protocol that is required to provide all of the kernel CMIS services in both roles?	c13	

c13: if A.6.1 then x else m

The supplier of the implementation shall state whether or not the additional functional units specified by CCITT Rec. X.711 | ISO/IEC 9596-1 are supported, in Table A.7.

**Table A.7 – Additional functional unit support**

Index	Functional unit	Sts	Spt
A.7.1	Multiple object selection	o	
A.7.2	Filter	o	
A.7.3	Multiple reply	c7	
A.7.4	Extended service	o	
A.7.5	Cancel get	c4	

### A.5.3 Protocol parameters

#### A.5.3.1 System wide parameters

System wide parameters have a single specification applicable for all APDUs in which they occur and the corresponding tables in which they occur contain references to the following declarations.

The supplier of the implementation shall state whether or not the following parameters specified by CCITT Rec. X.711 | ISO/IEC 9596-1 are supported and their type, value(s) and range(s), in Tables A.8 through A.12. The supplier shall indicate the status of support for sending and receiving each parameter.

**Table A.8 – Scope parameter support**

Index	Parameter name	Syntax	Value	Sender			Receiver		
				Sts	Spt	TVR	Sts	Spt	TVR
A.8	Scope	CHOICE	—	c14			c15		
A.8.1		INTEGER	0 to 2	o.4			m		
A.8.2	individualLevels	INTEGER	—	o.4			m		
A.8.3	baseToNthLevel	INTEGER	—	o.4			m		

c14: if A.7.1 and (A.14.1/1 or A.14.3/1 or A.14.5/1 or A.14.6/1) then m else —

c15: if A.7.1 and (A.14.1/2 or A.14.3/2 or A.14.5/2 or A.14.6/2) then m else —

**Table A.9 – FilterItem parameter support (sending)**

Index	Parameter name	Syntax	Sts	Spt	TVR
A.9	FilterItem	CHOICE	c9		–
A.9.1	equality	SEQUENCE	o.5		
A.9.1.1	attributeId	CHOICE	m		–
A.9.1.1.1		OBJECT IDENTIFIER	o.6		
A.9.1.1.2		INTEGER	o.6		
A.9.1.2	attributeValue	ADB attributeId	m		
A.9.2	substrings	SEQUENCE OF CHOICE	o.5		
A.9.2.1	initialString	SEQUENCE	m		
A.9.2.1.1	attributeId	CHOICE	m		–
A.9.2.1.1.1		OBJECT IDENTIFIER	o.7		
A.9.2.1.1.2		INTEGER	o.7		
A.9.2.1.2	string	ADB attributeId	m		
A.9.2.2	anyString	SEQUENCE	m		
A.9.2.2.1	attributeId	CHOICE	m		–
A.9.2.2.1.1		OBJECT IDENTIFIER	o.8		
A.9.2.2.1.2		INTEGER	o.8		
A.9.2.2.2	string	ADB attributeId	m		
A.9.2.3	finalString	SEQUENCE	m		
A.9.2.3.1	attributeId	CHOICE	m		–
A.9.2.3.1.1		OBJECT IDENTIFIER	o.9		
A.9.2.3.1.2		INTEGER	o.9		
A.9.2.3.2	string	ADB attributeId	m		
A.9.3	greaterOrEqual	SEQUENCE	o.5		
A.9.3.1	attributeId	CHOICE	m		–
A.9.3.1.1		OBJECT IDENTIFIER	o.10		
A.9.3.1.2		INTEGER	o.10		
A.9.3.2	attributeValue	ADB attributeId	m		
A.9.4	lessOrEqual	SEQUENCE	o.5		
A.9.4.1	attributeId	CHOICE	m		–
A.9.4.1.1		OBJECT IDENTIFIER	o.11		
A.9.4.1.2		INTEGER	o.11		
A.9.4.2	attributeValue	ADB attributeId	m		
A.9.5	present	CHOICE	o.5		–
A.9.5.1		OBJECT IDENTIFIER	o.12		
A.9.5.2		INTEGER	o.12		
A.9.6	subsetOf	SEQUENCE	o.5		
A.9.6.1	attributeId	CHOICE	m		–
A.9.6.1.1		OBJECT IDENTIFIER	o.13		
A.9.6.1.2		INTEGER	o.13		
A.9.6.2	attributeValue	ADB attributeId	m		
A.9.7	supersetOf	SEQUENCE	o.5		
A.9.7.1	attributeId	CHOICE	m		–
A.9.7.1.1		OBJECT IDENTIFIER	o.14		
A.9.7.1.2		INTEGER	o.14		
A.9.7.2	attributeValue	ADB attributeId	m		
A.9.8	nonNullSetIntersection	SEQUENCE	o.5		
A.9.8.1	attributeId	CHOICE	m		–
A.9.8.1.1		OBJECT IDENTIFIER	o.15		
A.9.8.1.2		INTEGER	o.15		
A.9.8.2	attributeValue	ADB attributeId	m		

**Table A.10 – FilterItem parameter support (receiving)**

Index	Parameter name	Syntax	Sts	Spt	TVR

NOTE – See Tables A.9 and A.10 for FilterItem parameter support.

**Table A.12 – CMISFilter complexity limitations**

Index	Complexity limitation	Sender	Receiver
A.12.1	Maximum nesting depth of CMISFilter expressions that may occur in an 'AND' (ref A.11.2)		
A.12.2	Maximum nesting depth of CMISFilter expressions that may occur in an 'OR' (ref A.11.3)		
A.12.3	Maximum number of FilterItem parameters in a CMISFilter parameter		

### A.5.3.2 Common parameters

Common parameters may have a specification applicable for many APDUs in which they occur. If the supplier of the implementation provides details of the support of any parameter in the tables below, then an index reference to these details may be supplied in the TVR column of any table in A.5.5 instead of repeating the information. The reference should be specified in the form “[see Table A.13.x]”. If the implementation supports a common specification for both the sending and receiving of any parameter, then it is recommended that Table A.13 be used for this purpose; otherwise the specification shall be inserted in the appropriate table(s) in A.5.5.

For example, if an implementation supports a single specification for the invokeID parameter, then the supplier may provide the details in Table A.13 and for each subsequent instance of the requirement to specify support for the parameter, insert a reference to the common specification as “[see Table A.13.1]”.

The supplier of the implementation may state the type(s), value(s) and range(s) of any of the following parameters specified by CCITT Rec. X.711 | ISO/IEC 9596-1, in Table A.13.

**Table A.13 – Common parameter support**

Index	Parameter name	Syntax	Spt	TVR
A.13.1	invokeID	INTEGER

A.13.12.2		INTEGER		

### A.5.3.3 Other parameters

Some parameters only occur in a limited number of APDUs. Declaration of the support for these parameters shall be specified in the tables in which they occur.

### A.5.4 Protocol data units

The supplier of the implementation shall indicate protocol support for each of the services in the kernel functional unit of CCITT Rec. X.710 | ISO/IEC 9595 in the invoker and performer roles, in Table A.14. If support for a service is claimed, the supplier of the implementation shall also complete the corresponding CMIP PDU table.

**Table A.14 – Protocol support for kernel CMIS services**

Index	CMIS service	Invoker role			Performer role		
		CMIP PDU table	Sts	Spt	CMIP PDU table	Sts	Spt
A.14.1	M-ACTION	A.15	c8		A.16	c8	
A.14.2	M-CREATE	A.19	c8		A.20	c8	
A.14.3	M-DELETE	A.21	c8		A.22	c8	
A.14.4	M-EVENT-REPORT	A.23	c8		A.24	c8	
A.14.5	M-GET	A.25	c8		A.26	c8	
A.14.6	M-SET	A.27	c8		A.28	c8	

An implementation shall be capable of receiving all of the ROIV APDUs associated with the kernel functional unit. If the corresponding service is not provided, the implementation shall issue an RORJ APDU. An implementation shall be capable of receiving an RORJ APDU.

If the supplier of the implementation claims to support M-ACTION in the invoker role, indication of support for each of the CMIP PDUs shall be supplied, in Table A.15.

**Table A.15 – CMIP PDUs required to support M-ACTION in the invoker role**

### A.5.5 PDU parameters

For each of the protocol data units specified by CCITT Rec. X.711 | ISO/IEC 9596-1, for which the "Sts" or "Spt" columns of Tables A.15 through A.28 indicate either a requirement for support or a claim of support, the supplier shall state whether or not each parameter of the protocol data unit is supported. The supplier shall indicate the type, value(s) and range(s) of each parameter. The supplier shall indicate the status of support for sending and receiving each parameter in each PDU.

### A.5.6 Negotiation capabilities

The supplier of the implementation shall indicate support for negotiation capabilities in Table A.121.

**Table A.121 – Negotiation capabilities**

Index	
A.121.1	Does the implementation support CMIP protocol version negotiation?
A.121.2	Does the implementation support CMIS functional unit negotiation?

### A.5.7 Protocol error handling

The supplier of the implementation shall indicate the conditions that result in the detection of a CMIP protocol error, in the box below. For each condition, the supplier shall indicate whether the resulting action is an A-ABORT or an RORJ. For each RORJ, the supplier shall specify the RORJ problem type and error code.

Conditions	A-ABORT or RORJ	RORJ problem type & error code

### A.5.8 Multi-layer dependencies

The supplier of the implementation shall state whether or not the association and operation classes defined by CCITT Rec. X.219 | ISO/IEC 9072-1 are supported, in Table A.122.

**Table A.122 – ROSE association and operation class support**

Index		Sts	Spt
A.122.1	Does the implementation support ROSE association class 3?	m	
A.122.2	Does the implementation support ROSE operation class 1?	o.128	
A.122.3	Does the implementation support ROSE operation class 2?	o.128	
A.122.4	Does the implementation support ROSE operation class 5?	m	

The supplier of the implementation shall state whether or not the functional units specified by CCITT Rec. X.216 | ISO 8822 are supported, in Table A.123.

**Table A.123 – Presentation functional unit support**

Index	Functional unit	Sts	Spt
A.123.1	Kernel	m	
A.123.2	Context management	o	
A.123.3	Context restoration	o	

The supplier of the implementation shall state whether or not the functional units specified by CCITT Rec. X.215 | ISO 8326 are supported, in Table A.124.

NOTE – The A-ABORT feature of CCITT Rec. X.227 | ISO 8650 mandates the use of the unlimited user data facility of ISO/IEC 8326/Add.2.

**Table A.124 – Session functional unit support**

**Annex B**  
**Formulaire PICS pour protocole de version 1**

(Cette annexe fait partie intégrante de la présente Recommandation | Norme internationale)

**B.1 Introduction**

If the supplier of an implementation of CCITT Rec. X.711 | ISO/IEC 9596-1 also claims to support either the dependent or general conformance class for CMIP version 1 as specified in ISO/IEC 9596, then a copy of the tables contained in this annex shall be completed, in addition to a copy of the tables in Annex A.

NOTE – ISO/IEC 9596:1990, *Information technology – Open Systems Interconnection – Common management information protocol specification* has been withdrawn and superceded by ISO/IEC 9596-1. There is no CCITT equivalent of ISO/IEC 9596.

The instructions for completing the PICS are contained in A.1.

**B.2 PDU parameters**

The supplier of the implementation shall state whether or not each parameter for each of the protocol data units specified by ISO/IEC 9596 are supported. The supplier shall indicate the type, value(s) and range(s) of each parameter. The supplier shall indicate the status of support for sending and receiving each parameter in each PDU.

Table B.1 is the CMIP version 1 of Table A.51. AttributeError was amended in CMIP version 2.

**Table B.1 – ROIV-m-LinkedReply-Set (sending)**

Index	Parameter name	Sts	Syntax	Value	Spt	TVR
