Recommendation ITU-T D.302 R (03/95)

**Determination of the accounting rate shares and collection charges for the international public telegram service applicable to telegrams exchanged between countries in Europe and the Mediterranean Basin**

The values of the standard transition and terminal rate shares components contained in Recommendation D.302 R were approved in 1984 and are therefore no longer regarded as applicable by the members of the TEUREM Group. Although therefore no longer current, the values are retained in this Recommendation for historic reference purposes only to assist in bilateral negotiations pending a replacement mechanism based on the results of the current Study Group 3 studies.
