

Never lose coverage.

ITU SpaceConnect - D2D

24.02.2026

Marko Keskinen

Skylo was founded so you never lose coverage

The Challenge

Carrier networks are focused on population centers yet cover just 15% of global surface

Traditional satellite networks are expensive and do not interoperate with carrier networks

Historically, satellite connectivity required custom hardware which increased costs further

Skylo is commercially live in 37 countries, > 72M km² of coverage

Strigo

ligado
NETWORKS

ECHOSTAR

Viasat

inmarsat

15M activations; Launching in phases with carriers with a goal of global coverage

Skylo is in execution phase with scale and a global ecosystem

Service & Device Partners

Module Partners

Chipset Partners

Industry Partners

15M activated devices, 15+ network integrations, 20+ chipsets, Full in-house tech stack
