

AI for Societal Good

Helen Köpman – European Commission

11-12 May 2026

AI can be a gift to humanity. But we must make sure that benefits are widespread and accessible to all.

We want AI to be a force for good.

We want an AI where everyone collaborates and everyone benefits. That is our path – our European way.

”

LIVING IN EU

- Promote ‘**European way of digital transformation**’ that is **inclusive, innovative, and sustainable**, balancing technological progress with European values and diversity.
- Over 160 cities, regions, and Member States committed to the initiative’s **Join, Boost, Sustain Declaration** on joining forces for sustainable digital transformation in cities and communities in the EU.
- Provide support to assess cities digital maturity and create digital transformation roadmap, building capacity for uptake of more advanced AI tools.
