

Making Cities Inclusive with Technology Innovation

Massimiliano Claps

IDC Research Director

May, 2026

Global examples of cities that can be “trusted” by people with disabilities

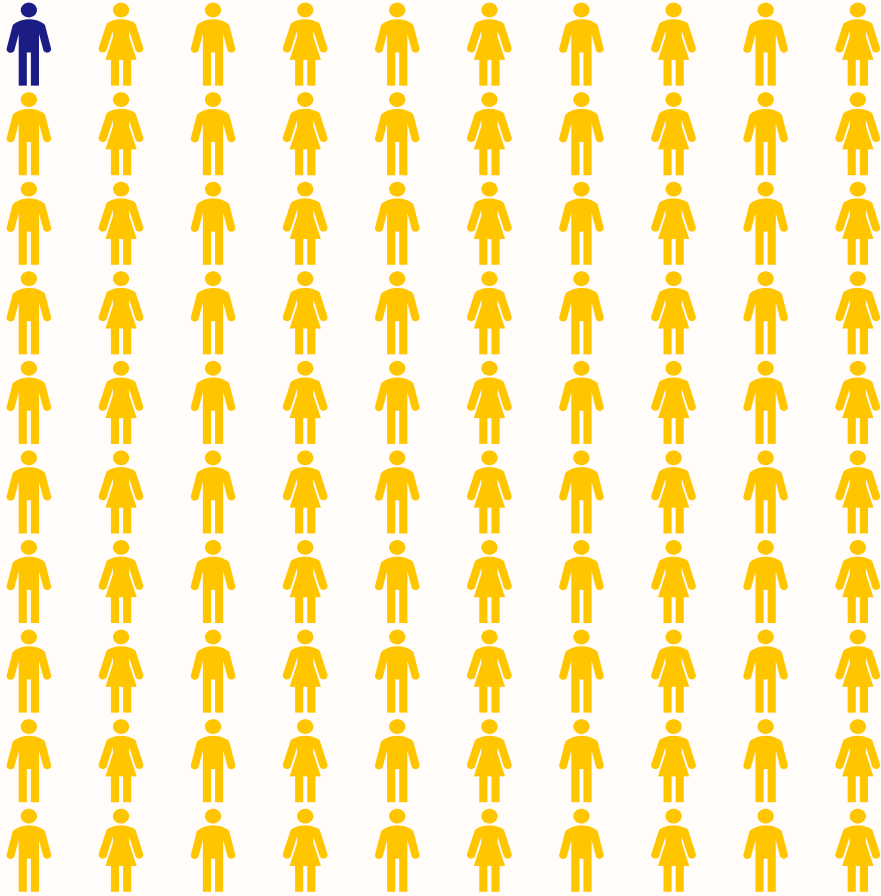

There's a social dimension to inclusion

One city at a time we can make a big difference

1 every 100 children is born with autism

When we will
have 7 bn
urban
dwellers by
2050

70 mln
people

Source: WHO

Even low tech can help, as long as it is people-centric
