

JVET-AH0182

Non-EE2: On intra and inter LFNST/NSPT for low delay configuration

**Y. Kidani, H. Kato, and K. Kawamura
(KDDI Corporation/KDDI Research, Inc.)**

- Propose two options to enable LFNST/NSPT for LDB/LDP with balancing gain and EncT.
 - Option 1: Early termination of intra-LFNST/NSPT for P/B slices
 - Option 2: Disabling intra-LFNST/NSPT for I/P/B slices using SPS flag
- Comparison of JVET-AH0103, AH0181, and AH0182, sorted by BD-rate Y.

Method	Results over ECM-12 under LDB configuration			Approach	Intra-LFNST/NSPT		Inter-LFNST/ NSPT	Early Term. intra-LFNST/ NSPT	Early Term. intra-LFNST/ NSPT	Early Term. inter-LFNST/ NSPT
	Y	EncT	DecT		I-slice	P/B- slice	P/B-slice	I-slice	P/B-slice	P/B-slice
ECM-12	N/A	N/A	N/A	N/A	X	X	X	X	X	X
AH0182 Test 1: ECM-12 + enabling intra/inter LFNST/NSPT	-1.58%	115.1%	101.4%	Non-normative	O	O	O	X	X	X
AH0182 Test 2: Test 1 + Option 1	-1.52%	106.5%	101.6%	Non-normative	O	O	O	X	O	X
AH0181	-1.43%	104.4%	104.2%	Non-normative	O	X	O	X	X	X
AH0103 Test A	-1.15%	101.7%	101.6%	Normative	O	X	O	X	X	O
AH0182 Test 3: Test 1 + Option 2	-1.04%	104.1%	102.0%	Normative	X	X	O	X	X	X
AH0103 Test B	-0.77%	101.2%	101.6%	Normative	X	X	O	X	X	O

■ Option 1: Early termination of intra-LFNST/NSPT for P/B-slices

● Based on comparison:

- RD cost at the end of inter coding: J_{Inter}
- RD cost of intra coding without LFSNT/NSPT: $J_{\text{intra-NonNST}}$

■ Option 2: Disabling intra-LFNST/NSPT for I/P/B-slices using SPS flag

■ Test 1: ECM-12 + Enabling intra/inter-LFNST/NSPT

- **Two options are proposed to apply LFNST/NSPT for LDB/LDP.**
 - **Option 1: Early termination of intra-LFNST/NSPT for P/B slices**
 - **Option 2: Disabling intra-LFNST/NSPT for I/P/B slices using SPS flag**

- **Option 1 and 2 achieve a better trade-off, but trade-off of Option 2 is worse than AH0181 Test A.**

- **It is recommended to study combination test of AH0181 Test A and Option 1, i.e., early termination of both intra/-inter LFNST/NSPT, in the next EE.**

Thanks to InterDigital for crosscheck!
