

## Kibot2

Korea Telecom, Korea

[www.kt.com](http://www.kt.com)

A smart robot full of educational content and multimedia features, Kibot2 gives children between the ages of 3 and 13 an opportunity to learn and interact in a playful way. Enjoy content on a larger scale with the beam projector, interact with voice and touch recognition, place voice and video calls and control Kibot2's speech and movement remotely through a smartphone app.

## Necomimi

[www.neurowear.com](http://www.neurowear.com)

A simple, effective demonstration of emotion translated into and via technology, Necomimi takes the form of a pair of small extension ears reading and translating your feelings into movement. Test a new means of communication which returns to nature in its imitation of animal behaviour whilst looking forward to technology-driven future interactions.
