GEROCO is a company providing a web marketing platform for electricity suppliers and telecom providers focused on their customers. Through our usage of Web 2.0, we achieve the merge of customer relationship management with home energy consumption reductions. Our customers are electricity and telecoms suppliers using GEROCO's solutions as a new form of communication between provider and final consumer. Social networking supports customer loyalty campaigns. The end user recognizes the usefulness of our smart device and our strength in communication strategy. This platform is made according to customers' wish and or needs! Completely modular and based on the social networking spirit!
