Etihad Atheeb Telecom Co. (GO), the latest telecommunications operator in Saudi Arabia, has obtained its second licence for fixed-line telephones from CITC, as a result of the strong alliance with a group of leading companies in the region (ATHEEB Ltd., "Batelco", Nahla Trading and others). GO has the best potential to provide unique technical solutions and deploys the latest technology in order to secure the excellent level of its services in telecommunications, such as in telephony over the Internet (broadband). All of this and much more through the latest techniques of WiMAX and other new technologies
