Created in Paris, France, in 1925, the International Amateur Radio Union (IARU) is the watchdog and spokesman for the world Amateur Radio community. Because the radio spectrum is an international natural resource, Amateur Radio must organize nationally and internationally for better mutual use of the radio spectrum among radio amateurs throughout the world, to develop Amateur Radio worldwide, and to successfully interact with the agencies responsible for regulating and allocating radio frequencies. The IARU enables national Amateur Radio societies throughout the world to work together for the international good of Amateur Radio under the auspices of a representative democracy.

Demand is skyrocketing for more and smarter ways to communicate. On a smarter planet, almost anything can become digitally aware, instrumented and interconnected. Can we keep up? When things communicate, systems connect. And when systems connect, the world gets smarter. [www.ibm.com/smarterplanet](http://www.ibm.com/smarterplanet). To learn more about IBM smarter telecommunications for a smarter planet, we invite you to hear IBM speakers at the ITU Forum and VIP Forum, and to meet with IBM representatives in the Telecom Village (Hall 2 #2510) at ITU Telecom World 2009. For more information, please visit our website <http://www.ibm.com/events/ITU2009>
