The International Maritime Organization (IMO) is the United Nations specialized agency responsible for improving the safety of international shipping and preventing marine pollution from ships. Established in 1948, the Organization now has 168 Member States. IMO Publishing is committed to supplying the world's maritime community with high-quality printed and electronic publications in the six official languages of the Organization: English, French, Spanish, Arabic, Chinese and Russian. The dissemination of this information plays an important role in promoting shipping as a safe, secure, efficient and environmentally friendly method of transporting goods around the globe.
