Mandozzi Elettronica SA is a Swiss enterprise specialized in developing and manufacturing 2 Mbps Mux/Codec equipment for distribution and contribution networks, as well as digital audio routers and mixers for radio broadcasting. Mandozzi is appreciated for the ability of its engineers to listen to customers and to adapt the software and the hardware of the proven products to individual operational and technical requirements. The very successful transmission system COMBIMUX was first installed in 1999 and has since been kept up-to-date with the latest technical progress. It offers audio over IP facilities according to EBU-N/ACIP.
