The Ministry for Telecommunications and Information Technologies of Angola is responsible for the implementing of the State policy in Telecommunications, Information Technologies and Postal Service spheres. Together with the Angolan companies (Angola Telecom, Unitel, Movicel, MS Telcom and Infrasat), it is proud to show the world the major achievements regarding the efforts to take Telecommunications/ICT to all areas of the country while ensuring quality and good prices, in a profitable market for investors. The Angolan government has the vital goal to turn the country into a truly global player, especially amongst CPLP countries and in the SADC region.

Bureau on ICT for Education was created under Ministry of Education of the Republic of Azerbaijan within State Program on Informatization of Education System in 2008-2012. The goal of this programme is improvement of the quality of education through efficient application of modern information and communication technologies in all educational grade levels. Data and Resource Center is the entity that was created within this Bureau and is the core of the technical infrastructure of Azerbaijani Educational Network aimed to gather education resources and provide educational institutions with access to local and international education content and Internet.
