Established in 2003, the Number Resource Organization (NRO) is comprised of the world's five Regional Internet Registries (RIRs): AfriNIC, APNIC, ARIN, LACNIC and the RIPE NCC. RIRs register and distribute Internet number resources (IPv4 and IPv6 address space and AS Numbers), provide tools and services for their local Internet communities and work together as the NRO to collaborate on joint projects. The NRO is the coordinating body that provides global industry partners with a single point of contact to the RIRs. More information about the NRO can be found online at: www.nro.net

NTT is the holding company of the NTT Group, one of the world's biggest enterprises. Focusing on safety, security and reliability, the NTT Group engages in business operations as a pioneer of the broadband ubiquitous era. The NTT Group has led the development of telecommunications in Japan for more than a century. The major companies that comprise the NTT Group continue to accommodate the emerging needs of the ubiquitous broadband society in the 21st century, while fulfilling their social mission in each business field in an increasingly competitive global market environment.
