Rostelecom is the leading telecommunications operator in Russia, serving over 40 million retail customers. Rostelecom's 150 000-km network spans throughout the Russian Federation with extensions into Europe, Asia, CIS and Baltic countries. This allows Rostelecom to be a strong partner on the wholesale market, providing voice- and IP-based services to more than 600 national and international carriers. The wholesale portfolio includes various levels of customization to match the customer service and technical requirements of each operator/partner. The company has international POPs in London, Stockholm, Frankfurt and Hong-Kong.
