Spain

One of the main actions the Ministry of Industry, Tourism and Trade is based on the improvement in competitiveness of the Spanish economy. A competitiveness that requires, among other subjects, investment in technology, innovation, infrastructure modernisation, strengthening of the industrial network and development of the Information Society. Within this sector, the project "PLAN AVANZA" (www.planavanza.es) boosts the spreading of Internet at school, electronic administration or Broad Band. Furthermore, the Ministry sets as a priority the internationalisation of Spanish companies.

Shandong Senter Electronic Co., Ltd has been active mostly in telecommunication maintenance for more than 13 years. Its products include ADSL test sets, fibre optical test sets, cooper cable fault test set and telephone line test sets. Our ADSL2+ tester (ST332B) won several big tenders over the past two years, and this year our research will focus on a new generation of optical testers, such as a new optical power metre and a PON power metre. Senter aims to offer the best products and service to its customers.
