Swissvoice has been an important actor on the residential telephony market for a long time. Whether through collaboration with national Network Operators or through retail, Swissvoice has demonstrated and imposed its values of innovation and quality over the years. Our "swiss made" developments allow us to thoroughly comply with European consumers' requirements. Beyond innovation and product quality, Swissvoice seeks to conceive products balanced between design and technology so that using a Swissvoice product will always remain a unique sensory experience. To make each call an unforgettable experience...
