Established in 1997, UniData first introduced the dial-up PC communication-based voice solution and continued on to develop a Video-based compact wireless communication device. In 2008, the company has been reached IP phone sales over the million sales hit on record with LG Dacom. UniData have completed compatibility tests between UniData's IP phone and Nortel, Avaya, Broadsoft and is supplying the product to the markets abroad through 11 partners over the world. UniData also released the world's first wireless video WLAN phones SQ-3000, SQ-3500 and SQ-3100 in 2009.

UKTA is a not-for-profit organisation made up of a number of member UK companies, organisations and institutions and possesses a proven track record for developing relationships within the communications industry. UKTA is a Sector Member of ITU-T and ITU-D and sees its strong bond with ITU as a catalyst to further 'knowledge transfer' globally and, in particular, to Africa and China, in an effort to support the achievement of HRD millennium goals.
