The WiMAX Forum® is an industry-led, not-for-profit organization formed to certify and promote the compatibility and interoperability of broadband wireless products based upon the harmonized IEEE 802.16e/ETSI HiperMAN standard. A WiMAX Forum goal is to accelerate the introduction of these systems into the marketplace. WiMAX Forum certified products are interoperable and support broadband fixed, nomadic, portable and mobile services. For more information on WiMAX, please visit www.wimaxforum.org or www.wimaxtimes.com.

WiSeKey is a leading information security and identity management company that provides specialized security technologies for data protection and effective identification and authentication of people and objects over physical infrastructures, networks and the Internet to ensure secure communications and e-transactions, without compromising trust. WiSeKey has introduced the concept of a "secure digital identity" that: is assigned and maintained within a community; is attributed to an individual in an unforgeable way; respects the privacy of the individual; can be managed in a manner that balances privacy with broader security interests (e.g. national security).

The World Meteorological Organization (WMO) is the UN system's authoritative voice on the state and behaviour of the Earth's atmosphere, its interaction with the oceans, the climate it produces and the resulting distribution of water resources. WMO membership includes 188 Member States and Territories. It originated from the International Meteorological Organization, founded in 1873. Established in 1950, WMO became specialized agency of the United Nations in 1951 for weather and climate, operational hydrology and related geophysical sciences. WMO promotes international cooperation in the establishment of networks for making meteorological, climatological, hydrological and geophysical observations, as well as the exchange, processing and standardization of related data, and assists technology transfer, training and research, and in the protection of the environment.
