Yota is the first Russian Mobile WiMAX network (in IEEE 802.16-2005 standard) providing internet access at speeds up to 10 Mbps and handover between base stations without session breaking. High-speed wireless network has been already deployed in Moscow, St. Petersburg and Ufa. Yota offers unique mobile services, using the possibilities of fast wireless internet access: mobile IPTV, video-on-demand, online music catalogue listing hundreds of thousands of tracks by world leading labels, photoblogging portal and others. Yota brand consolidates the companies, responsible for network deployment, software development and media content aggregation. For more information, visit the official web-site at www.yota.ru/en/.
