

VIP Programme and Lounge

In addition to the networking service offered within myEventPlanner, VIPs have access to personalized appointment setting. The onsite VIP Lounge offers an exclusive setting that can be used for more private meetings. This VIP-restricted area for work and rest provides a unique vantage point for mingling and making contacts. Ensure your VIP is making the most of this Programme to interchange with top officials and leading industry players.

Restaurants and Cafeterias

Use your time efficiently by organizing meetings around tasty temptations. For a breakfast meeting or executive lunch, visit one of the restaurants throughout the venue offering a delectable choice of local and international cuisine, or contact these establishments directly should you require special catering arrangements. And when business is paramount and time is short, consider the snack bars for a quick bite, coffee, tea and other beverages. A little savory something throughout the day will help keep your energy level high.

Gathering Points

Amidst the bustle of the Exhibition showfloor or between Forum sessions, meet with contacts at strategically located gathering points. The VIP Lounge is the gathering point for exclusive access to VIPs, and is the hub for VIP activities. Other lounge areas are found in the exhibition area. If you are looking for internet access, wireless internet access is available throughout the site, and lounges provide a comfortable setting for getting connected, and they are often conveniently located close to a coffee bar.
