Business Monitor International's telecommunication online service provides subscribers with independent analysis, 5 year forecasts and company profiles on a country-by-country basis, covering the key trends impacting on global telecommunications markets. The service is broken down into three sections: mobile (including VAS analyses), broadband and fixed line. The service incorporates access to the latest analysis and data, a searchable archive and PDF access to the in-depth strategic reports and monthly insights. The online database covers five regions: Asia, Western Europe, Emerging Europe, the Middle East & Africa and the Americas. Further information can be found on: www.businessmonitor.com/bmo/telecom.

BusinessWeek is a global source of essential business insight that inspires leaders to turn ideas into action. Through content, context and collaboration, BusinessWeek moderates global conversations and moves business professionals forward. Founded in 1929 and published by the McGraw-Hill Companies, BusinessWeek magazine is the market leader, with more than 4.8 million readers each week in 140 countries. Local language editions include Chinese, Thai and Bahasa Indonesian. Launched in 1994, BusinessWeek.com is the pre-eminent provider of daily, essential business news, information and services to business decision-makers.
