Corecess Inc. is a leading access network equipment provider headquartered in the satellite city of Seoul, Korea. The company was founded in January 1997 and developed a tremendous spirit for achievement. Corecess builds telecommunication infrastructure products for local access-networks and brings integrated solutions to the local loop, while reducing costs, optimizing bandwidth and speeding up provisioning. Corecess' product line features state-of-the-art access technology and enables the creation of value-added services over all of today's network media in local loops, from old phone-grade copper lines to fibre-optics, covering from service provider's facilities to the subscriber's premises.
