Dirección General para el Desarrollo de la Sociedad de la Información

Capitán Haya, 41
ES-28071 Madrid
Spain

The Directorate-General for Information Society actively cooperates with the regions and municipalities in the development of the Information Society in Spain. Its main project is "PLAN AVANZA" (www.planavanza.es), which boosts the spreading of Internet at schools, enterprises, households and Public Administrations. This Directorate-General also focuses on the extension of broadband.

Dirección General de Telecomunicaciones

Capitán Haya, 41
ES Madrid
Spain

The Directorate-General for Telecommunications and Information Technologies actively participates in the regulation of telecommunications and radiocommunication. The main priorities focus on the development of a solid and competent telecommunication sector, on the introduction of advanced services and on broadband networks. Likewise, this Directorate-General resolutely cooperates with and boosts the digitalization of radio and television, thus allowing for the introduction of the new services of digital radio and digital terrestrial television.
