The DAISY Consortium embraces the principles of collaboration and transparency that define open standards development. With its member organizations literally spanning the globe, the DAISY Consortium is able to build project teams of talented administrators, software architects, and implementers that are representative of the global population served by the DAISY multimedia standard. Collaborative efforts result in accessible standards and systems that reflect the needs of persons with disabilities, while providing the richest reading experience for the whole population. More information about the DAISY Consortium and the DAISY multimedia standard is available at <http://www.daisy.org/>.

Damery

Stand 4421 Belgium Pavilion

DAMERY SA

Chaussée de Binche 101D
BE-7000 Mons
Belgium
Tel: +32 65 22 60 64
Fax: +32 65 22 60 64
Email: sales@damery.be
URL: www.damery.be

Damery S.A. is a privately held Belgian R&D company. The terms "engineering-based", "creativity" and "flexibility" define Damery's orientation. All tasks that do not directly serve R&D as well as product implementation are carried out by third parties as services. Our aim is to deliver cutting-edge technology "voice-video-data" over existing (coax&HFC) network infrastructures, at affordable prices. The Damery team masters the basic DOCSIS.2.0-CMTS technology and believes that the OPAL-CMTS line (indoor-outdoor), the provision and monitoring software ProMo and the integrated Telp-gateway (including soft-switch function) are the main stones on which to build a triple-play solution for small- to medium-size CATV operators and ISP.

Datang
