The Ministry of Communications and Information Technology (MCIT) has worked steadfastly to unleash the potential of the ICT sector in Egypt. It has taken giant strides to build an information society and provide its citizens with the tools needed to fully interact with this new technological wave. MCIT, as the authority leading such efforts, promotes public-private partnerships to build the physical infrastructure that carries the digital economy and provides extensive training to develop the country's human resources, enhance e-content on the web, and to establish the Egyptian position in the outsourcing industry and call centres business.

## eHealth Pavilion

Stand 4239

### WORLD HEALTH ORGANISATION

20 avenue Appia  
CH-1211 Geneva 27  
Switzerland  
URL: [www.who.int](http://www.who.int)

WHO is the directing and coordinating authority for health within the United Nations system. It is responsible for providing leadership on global health matters, shaping the health research agenda, setting norms and standards, articulating evidence-based policy options, providing technical support to countries and monitoring and assessing health trends. In the 21st century, health is a shared responsibility, involving equitable access to essential care and collective defence against transnational threats.
