ETON specializes in the production of high technologies for electronics and connectics. ETON makes the newest and best technology for IDC connectors for the industry and telecoms networks. The ETON technology of very high compression (patented) and IDC are recommended for high-speed and highbandwidth networks (ADSL, Internet, categories 5 and 6). The reliability is more than 10 to 60 times that of classic technologies for "U" for solid copper and stranded conductors (AWG 14 to 28). All ETON 23 connectors have been approved by international Telecoms operators. Compliance with RoHS and REACH.
