

# Catalogue of ITU publications

Dear  
Customer,

Thank you for your trust in ITU publications and for continuing to support our work as a leading international publisher of information and communication technology (ICT) reports and data.

Since our founding 150 years ago, ITU has been at the very heart of ICT information dissemination. Today, our range of publications and global customer base continues to grow strongly, and we appreciate your contribution to our continuing success.

ITU has a range of products that makes us unique in the publishing world. In this catalogue, you'll find titles on topics ranging from spectrum management and satellite communications to ICT statistics and policy and development reports. So whether you're a broadcast engineer, an ICT regulator, a computer systems specialist, a telecoms professional, a business analyst or a student of ICTs, you're sure to find something of interest. As ITU's activities broaden to reflect the increasing pervasiveness of digital technologies in just about every business sector, you'll also find new titles on topics such as cybersecurity, e-health, using ICTs to combat climate change, the effective deployment of ICTs in emergency communications, next-generation technical standards, and much more.

Most ITU publications are now available in electronic format (and some in both electronic and hard copy formats), and can be purchased and downloaded directly from the **ITU BOOKSHOP**. If you prefer a print or CD-ROM publication, you can order these online, or use the order form included in this catalogue.

ITU publishes in all six official UN languages – Arabic, Chinese, English, French, Russian and Spanish – and many (though not all) titles are available in multilingual versions. This catalogue also contains useful information on pricing discounts, methods of payment and related conditions of sale, as well as a list of whom to contact should you need additional support.

Stay abreast of ITU publications at [www.itu.int/publications](http://www.itu.int/publications) – our pages are updated regularly, with information on new publications posted as soon as they become available. You can also connect to the weekly update of this catalogue at [www.itu.int/pub/S-GEN-CAT.OL-2015/en](http://www.itu.int/pub/S-GEN-CAT.OL-2015/en)

As always, we welcome your feedback and comments – just drop us a line at [sales@itu.int](mailto:sales@itu.int)

# About ITU Overview

ITU is the United Nations specialized agency for information and communication technologies – ICTs.

We allocate global radio spectrum and satellite orbits, develop the technical standards that ensure networks and technologies seamlessly interconnect, and strive to improve access to ICTs to underserved communities worldwide.

ITU is committed to **connecting all the world's people** – wherever they live and whatever their means. Through our work, we protect and support everyone's fundamental right to communicate.

**Today, ICTs underpin everything we do.** They help manage and control emergency services, water supplies, power networks and food distribution chains. They support health care, education, government services, financial markets, transportation systems, e-commerce platforms and environmental management. And they allow people to communicate with colleagues, friends and family anytime, and almost anywhere.

With the help of our global membership, ITU brings the benefits of modern communication technologies to people everywhere in an efficient, safe, easy and affordable manner.

ITU membership reads like a Who's Who of the ICT sector. We're unique among UN agencies in having both public and private sector membership. So in addition to our **193 Member States**, ITU membership includes ICT regulators, many leading academic institutions worldwide, and some **700 tech companies**.

In an increasingly interconnected world, ITU is the single global organization embracing all players in this dynamic and fast-growing sector.
