Purpose : Proposal

Title : **POLICING FUNCTION FOR VBR CODING**

At the ETSI NA5 meeting in Corfu, 14-17 October 1991, we learnt from the joint meeting with ETSI NA5 TCR (Traffic Control and Resource) that in the 92 recommendation only the peak rate will be negotiated.

We therefore propose that as far as VBR is concerned, CCITT SGXV undertakes some action to actively try to specify some policing functions for VBR video coding.
