TITLE : Proposal for the joint work between ISO/MPEG and CCITT/AVC EG
PURPOSE : Proposal

The aim of this proposal is to improve the collaboration between ISO/MPEG and the CCITT/AVC Experts Group.

As the goal of the joint work between ISO and CCITT is to define a unique standard for services of both groups, everyone has to take into account the requirements of each other when defining the coding scheme.

Therefore, we propose that the meetings of the Video and Requirements groups on matters related to H26x/MPEG-2 should be held in sequence.
