

CCITT SGXV

SPECIALIST GROUP ON CODING FOR VISUAL TELEPHONY

SAN JOSE, 10-13 March 1987

TITLE : PATENTS

SOURCE : ALCATEL CIT

POSITION OF ALCATEL CIT REGARDING PATENTS
IS GIVEN IN ANNEXE

ALCATEL CIT

#212

In case a recommendation by the CCITT for a $n \times 384$ Kbit/s picture coding for visual telephony, ALCATEL CIT will grant licences under its patents the applications of which have been filed prior to the adoption of this recommendation to all users on a non exclusive basis and on non discriminatory and reasonable termes.

- Only to the extent to which the patents are an insurmountable bar to the implementation of said recommendation,
- Solely for purposes of implementing said recommendation and
- On condition that any such user first express willingness to grant to ALCATEL CIT, for it self and its subsidiaries, similar licences under its own patents, if any, the applications of which have been filed prior to the adoption of said recommendation and which are equally an insurmountable bar to the implementation of said recommendation.

H. PARENTY

A handwritten signature in dark ink, appearing to read "H. Parenty". The signature is written in a cursive, flowing style with a prominent vertical stroke at the beginning.
