Guidelines on how to utilize the National Numbering Plan (NNP)

1) The numbers between 200 and 999 followed by four digits make a total of close to 8 million telephone numbers in each province, which could be divided among different carriers.

2) AWCC (GSM mobile licensee with assigned carrier code 70) continues to utilize a 6-digit subscriber format. All other GSM/CDMA licensees have migrated to the 7-digit subscriber format. The fixed-line network is also being migrated to the 7-digit subscriber format.

3) Carrier codes 71, 72, 73, 74 and 76 are reserved for future licensees.

4) The CDMA/WLL numbers will have 07X followed by seven digits in the same way as the fixed-line subscribers. Out of the seven digits, two can be used to identify locations and five as the Subscriber Number (SN).

See the Table below.

Dialling instructions

– For trunk calls: 0 + Area or Carrier Code + Subscriber Number (SN)

– For international calls: 00 + Country Code (CC) + Area Code + Subscriber Number (SN)

The following Table shows how, in the case of CDMA, the 8 million numbers can be distributed among cities and provinces all over the country.

Numbering Plan CDMA

Country Code: +93, Access Code: 75 and geographical distribution as in table below:

Mexico (country code +52)

Communication of 11.X.2006:

The *Comisión Federal de Telecomunicaciones (COFETEL*), Mexico, announces, further to the information published on page 14 of ITU Operational Bulletin No 860 of 15.V.2006, concerning the Resolution on introduction of the "national calling party pays" arrangement applicable to domestic long-distance and international calls terminating at a user of the local mobile service in Mexico (published in the *Diario Oficial de la Federación* (official Bulletin) of 13 April 2006), that the aforementioned service arrangement will be applied as of the first minute of 4 November 2006.

It is important to mention that as a result of the legal appeals lodged by Maxcom Telecomunicaciones, SA de C.V. (Maxcom); Alestra, S de RL de C.V. (Alestra); Axtel, SA de C.V. (Axtel) and Avantel, S de RL de C.V. (Avantel), the *Comisión Federal de Telecomunicaciones (COFETEL)* has been informed that those companies have been granted an injunction for temporary suspension of the resolution introducing the "national calling party pays" arrangement, with the effect that they are not for the time being obliged to comply with the terms of the aforementioned Resolution.

Administrations and Recognized Operating Agencies (ROAs) are hereby informed that no actions should be taken that violate the temporary suspensions currently in force.

United Kingdom (country code +44)

Communication of 25.IX.2006:

The *Office of Communications (Ofcom),* London, announces that, as from 26 September 2006, Ofcom, the United Kingdom's national regulatory authority, will be issuing telephone numbers for mobile use that begin with "075XX". This is in addition to those currently available that begin with "077X, 078X and 079X".

Ofcom wishes to reiterate that mobile number ranges are allocated in blocks of 100 000. In the past, numbers have been allocated in groups of one million numbers at a time (e.g. $10 \times 100\,000$ number blocks). However, some new companies in the UK only need a 100 000 block of numbers. Therefore, it should be noted that either four- or five-digit analysis will be required for the routing of UK mobile numbers.

All international carriers are urged to ensure that their and their customers' equipment is programmed to allow for calls to be passed to all "075X" plus seven-digit telephone numbers.

The following numbering ranges for mobile services have been allocated to communications providers in the United Kingdom (country code +44):

Telex service

Netherlands
United States

Joint Communiqué of 2.X.2006:

KPN Voice Services Business Market, The Hague (Netherlands) and *Easylink Services Corp.*, Piscataway, New Jersey (United States), announce in this joint communiqué the transfer of KPN Telex Service to Easylink Services Corp. (United States) as of 30 November 2006. As a result of the transfer, the telex exchange system in the Netherlands will no longer be available. Easylink Services Corp. (United States) shall be managing all telex messages to and from the Netherlands using the existing Telex Destination Code (TDC) "44" and Telex Network Identification Code (TNIC) "NL" allocated to the Netherlands (ITU-T Recommendations F.68 and F.69).

All telex services in the Netherlands, and transit telex services from other countries where Easylink Services Corp. (United States) operates international telex services, will be transited on their normal route to Easylink telex networks. Easylink Services Corp. (United States) will provide a switching service to other destinations.

All international telex direct-circuits, as well as transit via KPN, will need to be taken out of operation before the 31 December 2006, since the switch will no longer be in service after this date.

Until 30 November 2006, the international accounting procedure and the settlements of any outstanding payments of telex service will remain unchanged. After this date, all future settlements will be conducted with Easylink Services Corp. (United States) directly.
