 - For areas 4, 5 and 7, the number 4 will be added at the beginning of the existing area code, except for the provinces of Azuay, Cañar and Moriona Santiago, where the number 2 will be added before the existing area code.

Details of the change are shown below:

<i>National number(s)</i>			
<i>Existing code</i>	<i>Code after change</i>	<i>Subscriber number</i>	<i>Geographical coverage (province)</i>
2	22	ABCDEFGF	Pichincha

Norway (country code +47)

Communication of 28.IV.2008:

The *Norwegian Post and Telecommunications Authority (NPT)*, Oslo, recalls the introduction in 1999 of a special five-digit non-geographic number range in Norway. The range, allocated from 02000 to 09999, is well suited for large companies that desire an easy number.

The five-digit resource is limited to 8000 numbers and 750 numbers have so far been assigned.

However, some problems have been encountered when accessing these numbers from abroad – both from roaming Norwegian end users and from foreign customers. Consequently, the *Norwegian Post and Telecommunications Authority (NPT)* requests all administrations and Recognized Operating Agencies (ROAs) to ensure that access is given to the above number ranges, with immediate effect.

<i>Five-digit non-geographic number range</i>	<i>International dialling format</i>	<i>Remarks</i>
02000 – 09999	+47 02000 – +47 09999	Introduced in 1999, this number range is well suited for large companies that desire an easy number.
